Enforce compliance and acceptable use policy with industry-leading web classification.

Many industries must enforce web acceptable use policy (AUP) to comply with regulations. It’s especially vital in the education sector, where compliance with the Children’s Internet Protection Act (CIPA) in particular keeps students safe, reduces legal liability and often is a prerequisite for applying for government grants. Websense® Web Filter helps reduce the risk of non-compliance by using accurate and timely ratings to limit exposure to social media, videos and web anonymizers.

Why is Websense the best choice?
Web Filter software effectively enforces AUP to enable compliance with regulations such as CIPA. It provides more than 90 web categories, YouTube for Schools video control, customizable allow/deny lists and time quotas. Its master database is updated by the Websense ThreatSeeker® Intelligence Cloud, the world’s largest web monitoring network.

Over 90 Web Categories and YouTube for Schools Integration
- Industry-leading web security policy controls for over 90 web categories covering productivity, bandwidth and more.
- Custom allow/deny filters along with user defined categories can be timed or permanent.Integrated
- Controls for viral, entertainment and surveillance videos, plus support for YouTube Education videos.TruWeb DLP provides containment defenses against data theft, and enables regulatory compliance with over 1,700 pre-defined policies and templates.
- Websense Network Agent can control more than 150 applications and protocols via transparent port monitoring.

Collective Intelligence Updates From the ThreatSeeker Intelligence Cloud
- Receive updates from the world’s largest web monitoring network, which unites over 900 million endpoints and analyzes 3-5 billion web requests per day.
- Greater awareness provides timely, comprehensive and accurate web ratings to avoid non-compliance.

Unified Management and Reporting
- The Websense TRITON® Unified Security Center simplifies provisioning.
- Reporting includes over 60 pre-defined and easily customizable reports, plus administrative alerts.
- Unified TRITON architecture enables easy upgrade from Web Filter to Websense Web Security.

"Websense Web Filter was the only product that offered filtering, flexible reporting and tight firewall integration, while meeting all our technical requirements."

ThreatSeeker Intelligence Cloud:
The World's Largest Web Monitoring System

The ThreatSeeker Intelligence Cloud, managed by Websense Security Labs™, provides the core collective security intelligence for all Websense security products. It unites more than 900 million endpoints, including inputs from Facebook and Defensio™ technology, and, in conjunction with Websense ACE (Advanced Classification Engine) security defenses, analyzes 3-5 billion requests per day. This expansive awareness of security threats enables the ThreatSeeker Intelligence Cloud to offer real-time security updates that block advanced threats, malware, phishing attacks, lures and scams, plus provide the latest web ratings. The ThreatSeeker Intelligence Cloud is unmatched in size and in its use of ACE real-time defenses to analyze collective inputs. (When you upgrade to Web Security, the ThreatSeeker Intelligence Cloud helps reduce your exposure to web threats and data theft.)

<thead>
<tr>
<th>Your Needs</th>
<th>Websense Solutions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Easy AUP enforcement</td>
<td>Over 90 web categories enable detailed AUP enforcement. Customizable allow/deny lists can be timed or permanent and support exceptions; Network Agent provides port monitoring and control over hundreds of applications and protocols.</td>
</tr>
<tr>
<td>Regulatory compliance</td>
<td>Web Filter enables compliance with government and industry regulations such as CIPA.</td>
</tr>
<tr>
<td>Easy installation and management</td>
<td>Web Filter is a simple software deployment that’s easily integrated into your existing network infrastructure. The TRITON Unified Security Center enables role-based administration, alerts and custom reporting.</td>
</tr>
<tr>
<td>Comprehensive, up-to-date web ratings database</td>
<td>Collective intelligence and web ratings from the ThreatSeeker Intelligence Cloud, derived from over 900 million endpoints and the analysis of 3-5 billion requests per day, enable up-to-date AUP enforcement and compliance.</td>
</tr>
<tr>
<td>Analyze, manage and monitor network activity</td>
<td>Web Filter includes an intuitive, web-based console providing complete visibility into current network activity. Reporting is easy and intuitive.</td>
</tr>
<tr>
<td>Video controls to protect network resources, plus custom allow/deny filters</td>
<td>Allows access to YouTube Education videos, plus control over viral, entertainment and surveillance videos. Custom allow/deny filters can be timed to expire for special events. Support exceptions remediate number of help desk incidents.</td>
</tr>
<tr>
<td>Remote user protection</td>
<td>Optional remote filter agent directs remote users to the Web Filter deployment for web access providing policy enforcement.</td>
</tr>
<tr>
<td>Upgrade to Web Security when the time is right</td>
<td>Upgrade to Websense Web Security or Websense Web Security Gateway to get social web controls, SSL inspection, inline ACE real-time security and data theft prevention defenses, plus an advanced threat dashboard with forensic reporting and data theft capture on security incidents.</td>
</tr>

Mobile, social, and cloud technologies drive productivity. But they also open the door to data theft and advanced attacks that can slip right by anti-virus, URL filtering and firewall defenses. Websense® TRITON® solutions keep you a step ahead with web, email, data, cloud and mobile security solutions (available together or separately) that share a common architecture. The real-time defenses of Websense ACE (Advanced Classification Engine), plus flexible deployment options and a unified management console, make TRITON solutions vital in today’s dynamic environments.
