Web Filter & Security

PROXY-FREE THREAT PROTECTION WITH NEAR REAL-TIME SECURITY UPDATES

Websense® Web Filter and Security protects your network and resources against the latest threats and provides policy enforcement for productive web use. It’s informed by real-time security updates provided by Websense ThreatSeeker® Intelligence Cloud, a collection of more than 900 million unified endpoints that uses the security defenses of Websense ACE to analyze up to 5 billion requests per day.

WHY IS WEBSENSE THE BEST CHOICE?

Websense Web Filter and Security blocks web threats to reduce malware infections, decrease help desk incidents and free up valuable IT resources. With more than 120 security and filtering categories, hundreds of web application and protocol controls, and 60-plus reports with customization and role-based access, Web Filter and Security is an easy to deploy and transparent filter and security solution that avoids the complexity of a proxy gateway.

Real-Time Security Updates and Granular Policy Controls

- Receives near real-time security updates from the ThreatSeeker Intelligence Cloud. It’s one of the world’s largest threat analysis networks, and includes input from Facebook.
- Includes industry-leading web security policy controls, more than 120 web security and content categories, and time quotas with multiple authentication options for users and groups.
- Custom allow/deny filters can be timed or permanent, and can accept security intelligence from third-party sources.
- Has controls addressing viral, entertainment and surveillance videos, plus support for YouTube educational videos.
- Provides hundreds of controls for applications and protocols, and full port monitoring outside of proxy analysis.

Unified Management and Reporting

- Websense TRITON user interface simplifies provisioning and enables role-based reporting.
- Includes more than 60 pre-defined reports, many easily customizable reports and administrative alerts.
- TRITON architecture supports expansion to Email, Data or Mobile security products, or an upgrade to TRITON AP-WEB.

BEST PROTECTION WITHOUT A PROXY

- Security intelligence from the ThreatSeeker Intelligence Cloud
- Real-time security updates for the latest protection and ratings

REDUCE COMPLEXITY

- Transparent deployment using existing network infrastructure
- Appliance or software deployment
- One user interface to manage Web Security and any additional Websense email, data or mobile security product

IMPROVE PROTECTION

- Reduce malware infections and the risks of data theft and damage to reputation
- Reduce help desk incidents and time spent re-imaging systems
- Free up IT resources to enable new business operations

INCREASE PRODUCTIVITY

- Industry-leading policy controls, including time quotas
- Over 120 web categories, including videos, productivity and bandwidth

INTUITIVE MANAGEMENT AND REPORTING

- Set of four customizable dashboards for a comprehensive view into network activity and threat levels
- More than 60 pre-defined reports for display of business and technical information
- Easy customization, generation and distribution of reports

“Web sense helps us defend against millions of online attacks each month and has significantly reduced malware infections.”

- Security Official
  U.S. Dept. of Health and Human Services
Web Filter & Security

The ThreatSeeker Network uses ACE security defenses to analyze 3-5 billion requests per day using security lab expertise you can trust.

Your Needs

<table>
<thead>
<tr>
<th>Your Needs</th>
<th>Websense Solutions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Easy installation and management</td>
<td>Web Security receives real-time security updates from ThreatSeeker Intelligence Cloud to help protect against the latest advanced threats, malware, phishing and scams.</td>
</tr>
<tr>
<td>Real-time security updates for threat protection</td>
<td>Web Security receives real-time security updates from ThreatSeeker Intelligence Cloud to help protect against the latest advanced threats, malware, phishing and scams.</td>
</tr>
<tr>
<td>Analyze, manage and monitor threat levels and network activity</td>
<td>Web Filter and Security includes an intuitive, web-based console and dashboards that provide complete visibility into current threat levels, network activity and security policy enforcement. Reporting is easy and intuitive.</td>
</tr>
<tr>
<td>Video controls to protect network resources, plus custom allow/deny filters</td>
<td>Web Filter and Security allows the viewing of YouTube educational videos, and provides control over viral, entertainment and surveillance videos. Custom allow/deny filters can be timed to expire for special events, and they support exceptions to remediate help desk incidents.</td>
</tr>
<tr>
<td>Network port monitoring with application and protocol controls</td>
<td>The integrated Network Agent provides full port monitoring that includes monitoring of traffic outside of proxy analysis, and has controls for hundreds of applications and protocols.</td>
</tr>
<tr>
<td>Remote and Cloud user protection</td>
<td>An optional remote filter Module and/or a Web Filter Security Cloud Module provides web access to remote users for protection against threats and enforcement of policies.</td>
</tr>
<tr>
<td>Real Time Advanced Threat Defense</td>
<td>Upgrade to TRITON AP-WEB to get social media controls, SSL inspection, inline ACE real-time security and data loss prevention (DLP), and an advanced threat dashboard for forensic reporting and data theft capture during security incidents.</td>
</tr>
