Overview

Proficiency and precision are necessary to effectively implement quality security solutions. To help you get the most out of your Websense Web Security Gateway(s), Websense provides implementation packages designed to ensure:

- Your solution is deployed efficiently and effectively
- Your security policies are optimized
- You are satisfied with your implementation experience

Deliverables and Responsibilities

Delivery personnel will work closely with client staff to perform the following activities:

- Facilitate a kick-off meeting to provide an overview of the engagement process, including the responsibilities of each party
- Plan and schedule the installation and implementation activities
- Support the completion of the following activities within the framework of the environment size:
  - TRITON Server Stand-up (assuming WSG or WSGA)
  - MS SQL & AD Integration (assuming WSG or WSGA)
  - Client and Policy Creation
  - PAC File and/or agent creation
  - WCCP or PBR configuration of WCG (assuming WSG or WSGA)
  - Cloud Integration
- Knowledge Transfer
  - System and Architecture Overview
  - System Navigation
  - Rule/Policy Creation
  - User/Group Creation
  - Local Events, Alerting and Settings
  - Basic Reporting and Workflow

Client Requirements, Responsibilities and Resource Availability

The client must be able to provide the following components:

- Websense licenses
- SQL database and database accounts
- AD service account
- Availability of infrastructure, management, and network resources
- Pre-installation items identified via online project management tool
- WCCP or PBR configuration of customer’s network devices (assuming WSG or WSGA)
- Deployment of PAC file location via GPO
- Deployment of Endpoint Agent via software distribution tool
- Scheduled downtime
Client will be contacted within 48 hours of their order being processed to schedule the project kick-off call. Actual engagement dates will be determined during the kick-off call.

**Package Limitations**

- This implementation is delivered by remote delivery resources - No onsite delivery element
- This installation will not replace a Data Security Assessment in which data is scanned and classified
- This implementation will only provide HTTPS encryption to Security Categories, all other categories are not included
- The services within this offering are provided as-is with no changes

**Terms & Conditions**

- The implementation package is provided pursuant to the Subscription Agreement
- Implementation work must begin within 90 days of the Order or Subscriber forfeits the implementation package
- Subscriber’s assent to the Subscription Agreement constitutes acceptance of the above terms and conditions
- Deliverables within this package are non-negotiable

**Applicable add-on Options**

- Performance Tuning - HTTPS: Allows implementation of Websense’s advanced HTTPS feature. Enables organizations to decrypt traffic destined for categories such as Social Networking and Webmail.
- Performance Tuning - DLP: Creates customized DLP policies/rules utilizing custom classifiers to better address unique, unstructured data loss incidents.
