TRITON® QUICKSTART
ADD-ON PACKAGE

Performance Tuning - WEB
Onsite Delivery,
Small/Mid-size Company

Part Number: WEB2-X-XX00-N
Performance Tuning – WEB Add-on
Implementation Onsite
Overview

Proficiency and precision are necessary to effectively implement quality security solutions. To help you get the most out of your Websense® security solutions, Websense provides an additional Performance Tuning Add-on implementation designed to:

- Deploy your solution efficiently and effectively
- Optimize your security policies
- Maximize your satisfaction with the implementation process

Deliverables and Responsibilities

Delivery personnel will work closely with client staff to perform the following activities:

- Performance Tuning - HTTPS:
  - Implement Websense’s advanced HTTPS feature
  - Enable your organization to decrypt traffic destined for categories such as Social Networking and Webmail

Client Requirements, Responsibilities and Resource Availability

The client must be able to provide the following components:

- Performance Tuning – HTTPS
  - Client will either distribute Websense CA (with GPO for example) or sign the CSR via an internal CA

Engagement dates will be determined during the kick-off call for the underlying Websense product implementation. Client will be contacted within 48 hours of their order being processed to schedule the project kick-off call.
Package Limitations

- This implantation package would require a 4 week lead time to make appropriate travel arrangements.
- Any engagement, subsequent to the initially scheduled onsite would be handled remotely.
- The services within this offering are provided for the Web Add-on Module only.

Terms & Conditions

- The implementation package is provided pursuant to the Subscription Agreement.
- Implementation work must begin within 90 days of the Order or Subscriber forfeits the implementation package.
- Subscriber’s assent to the Subscription Agreement constitutes acceptance of the above terms and conditions.
- Deliverables within this package are non-negotiable.

Applicable add-on Options

- Data Security Extensive Tuning: Creates customized DLP policies/rules utilizing custom classifiers to better address unique, unstructured data loss incidents. Includes multiple interactions with delivery resources to interpret results and tune policies/rules.
- Additional implementation options are available at www.websense.com/QuickStart
