Overview

Proficiency and precision are necessary to effectively implement quality security solutions. To help you get the most out of your Websense® security solutions, Websense provides an additional Performance Tuning Add-on implementation designed to:

- Deploy your solution efficiently and effectively
- Optimize your security policies
- Maximize your satisfaction with the implementation process

Deliverables and Responsibilities

Delivery personnel will work closely with client staff to perform the following activities:

- Performance Tuning – HTTPS
  - Implement Websense's advanced HTTPS feature
  - Enable your organization to decrypt traffic destined for categories such as Social Networking and Webmail
- Knowledge Transfer
  - System and Architecture Overview
  - System Navigation
  - Rule/Policy Creation
  - User/Group Creation
  - Local Events, Alerting and Settings
  - Basic Reporting and Workflow

Client Requirements, Responsibilities and Resource Availability

- Performance Tuning – HTTPS
  - Client will either distribute Websense CA (with GPO for example) or sign the CSR via an internal CA

Engagement dates will be determined during the kick-off call for the underlying Websense product implementation. Client will be contacted within 48 hours of their order being processed to schedule the project kick-off call.
Package Limitations

- This implementation is delivered by remote delivery resources - No onsite delivery element
- The services within this offering are provided for the Web Add-on Module only

Terms & Conditions

- The implementation package is provided pursuant to the Subscription Agreement
- Implementation work must begin within 90 days of the Order or Subscriber forfeits the implementation package
- Subscriber’s assent to the Subscription Agreement constitutes acceptance of the above terms and conditions
- Deliverables within this package are non-negotiable

Applicable add-on Options

- Data Security Extensive Tuning: Creates customized DLP policies/rules utilizing custom classifiers to better address unique, unstructured data loss incidents. Includes multiple interactions with delivery resources to interpret results and tune policies/rules.
- Additional implementation options are available at www.websense.com/QuickStart
