Notice of End of Sale for SurfControl E-mail Filter for Exchange 2000/2003 Only

Dear Valued SurfControl Customer,

Websense is pleased to work with you and your organization to provide best-in-class Web security and information leak prevention technology to meet your specific needs. We are committed to serving you and we look forward to every opportunity to be your security solutions provider.

As customers' needs change and products mature, Websense sometimes finds it necessary to discontinue products, product versions, and services to ensure we continue to provide innovative and cost effective solutions. We recognize that these announcements impact customers and their business environments. To this end, when a product or product version reaches its end of life (EOL), we are committed to communicating important milestones throughout the transition period.

Websense has decided to End of Sale the SurfControl E-mail Filter for Exchange e-mail filtering product. E-mail Filter for Exchange 2000/2003 is our plug-in product that snaps into your Microsoft Exchange Mail Server to provide internal email filtering. This end of sale does not include SurfControl E-mail Filter for SMTP, which is our SMTP gateway product that works in conjunction with all onsite corporate mail servers, including Microsoft Exchange. In accordance with our established policy, Websense will accept new subscriptions and renewals for SurfControl E-mail Filter for Exchange for three months following the announcement date, in this case only through January 8, 2008. There will be no change to the technical support provided to customers at this time. In November 2007, we plan to provide detailed descriptions of our future updates and technical and database support packages.

The End of Life Schedule for SurfControl E-mail Filter for Exchange is as follows:

- End of Sale Announcement on October 8, 2007
- End of Sale for New Subscriptions (EOS-NS) occurs on January 8, 2008
- End of Sale for Renewals (EOS-renewal) occurs on January 8, 2008
- We will provide support for a minimum of 36 months after the End of Sale Date

Migration Options:

We appreciate the investment you have made in the SurfControl E-Mail Filter for Exchange, and we want to make the transition to Websense best-of-breed solutions as easy and compelling as possible for you when you decide to migrate to a new platform.

Existing SurfControl E-mail Filter for Exchange customers can upgrade to SurfControl E-mail Filter for SMTP. SurfControl E-mail Filter for SMTP provides content filtering for continuous protection against inbound, outbound, and internal e-mail threats including spam, denial of service attacks, viruses, data loss and regulatory violations. With its multi-layered protection and threat detection technology, E-mail Filter prevents malicious, inappropriate, or confidential data from entering or leaving an organization to reduce risk, enable business compliance, and ensure business continuity.

Websense has identified SurfControl E-Mail Filter for SMTP as an important piece of our long term strategy and it will remain in active development. We are excited about opportunities to integrate this technology more broadly across Websense's offerings, specifically focusing on building the world's best "reputation services" for the Web and e-mail.

We encourage you to contact technical support or your local channel partner to discuss migration and deployment options. For additional information regarding the acquisition of SurfControl, please remember to visit our web portal: www.websense.com/acquisition.
