

10/8/2007

**Notice of End of Sale for New Subscriptions: SurfControl Web Filter (software) and Mobile Filter**

Websense is pleased to work with you and your organization to provide best-in-class Web security and information leak prevention technology to meet your specific needs. We are committed to serving you and we look forward to every opportunity to be your security solutions provider.

As customers' needs change and products mature, Websense sometimes finds it necessary to discontinue products, product versions, and services to ensure we continue to provide innovative and cost effective solutions. We recognize that these announcements impact customers and their business environments. To this end, when a product or product version reaches its end of life (EOL), we are committed to communicating important milestones throughout the transition period.

Websense has decided to End of Sale SurfControl Web Filter and Mobile Filter for new subscriptions. In accordance with our established policy, Websense will accept new subscriptions for SurfControl Web Filter and Mobile Filter for three months following the announcement date, in this case only through, January 8, 2008. We will continue to accept subscription renewals after January 8, 2008

To protect your investment, we are offering price protection on existing SurfControl Web Filter and Mobile Filter subscriptions. When you renew your present subscription for the first time, we will ask you to pay the same amount, per seat or user, that you paid previously. If you add seats, users or sites, we'll price the expansion the same way.

Although we do not plan to add new features outside of database enhancement, Websense will support these products with a completely staffed maintenance and support team through at least December 31, 2011. There will be no requirement for you to "migrate" to Websense products during this timeframe.

In addition, Websense will enhance these products by supplementing the SurfControl URL database with additional Web filtering and security coverage provided by Websense Security Labs™ and Threatseeker™ technology, including more than 200,000 high-risk sites. We will continue to use the current SurfControl URL categories, so operational disruption will be minimized. We believe this will provide you with significantly improved security functionality. We plan to complete this integration by the end of the first calendar quarter of 2008.

**The End of Sales Schedule for New Subscriptions to SurfControl Web Filter (software) and Mobile Filter:**

- End of Sale Announcement on October 8, 2007
- End of Sale for New Subscriptions (EOS-NS) occurs on January 8, 2008

- We will continue to accept subscription renewals after January 8, 2008
- Commitment to provide support at least through December 31, 2011
