# Market leader in Europe

European Containerboard Market  
2011 Production (est)

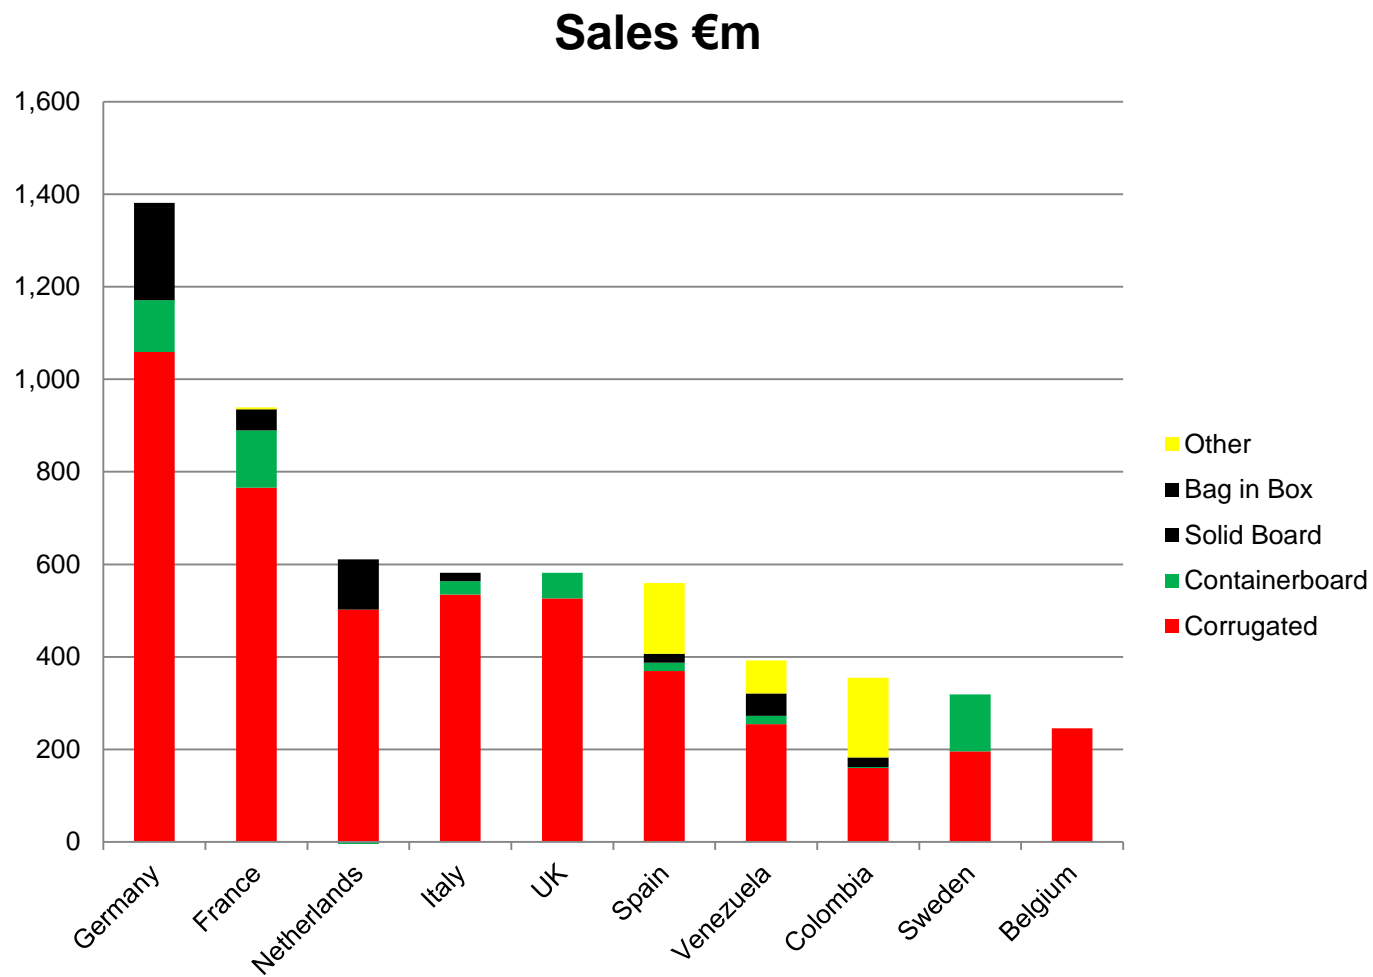

European Corrugated Market  
2011 Production (est)

# Top 10 Markets

# European Packaging – Paper

- Grades produced:
  - Brown Kraftliner
  - Brown Recycled Containerboard
  - White Top Kraftliner
  - White Top Testliner
  - High Performance Fluting
  - MG Paper
  - Sack Kraft
- N°1 producer on the European market in Containerboard
- The Division operates as one group on the European market with a central paper sales organisation in Paris and a network of regional sales offices
- The Division has its own paper recovery operations in several countries, in order to guarantee the supply of recovered fibre

# European Packaging - Corrugated

- **Solid board & solid board packaging**

- N°1 on the European market
- Advanced machine systems for Fruit & Vegetable, Meat and Beverages packaging

- **Carton board and folding cartons**

- N°3 on the European market
- Advanced packaging systems, high quality consumer retail packaging

- **Graphic Board**

- N°1 on the European market

- **Bag-in-Box™**

- N°1 worldwide in taps
- Bags for a wide range of applications
- One stop shop: integrated machine and box solutions

# Our Vision

---

SKG's vision is to be recognised as the most successful paper based packaging company in its chosen market sectors. To achieve this we will:

- act for the general good of the countries and communities in which we are privileged to operate,
- provide the safest possible natural environment, a sense of identity and a rewarding career opportunity for our employees,
- generate the highest level of satisfaction to customers,
- optimise returns to shareholders.

# Our Mission

To be a customer-oriented, market-led company where the satisfaction of customers, the personal development of employees and respect for local communities and the environment are seen as being inseparable from the aim of creating value for the shareholders.

integrated

- Started in 2004:  
**One** engineer supporting Kappa central services and Opco's and managing **25** servers.
- Currently:  
The Infra Operations team now consists of **21** individuals  
The department is responsible for the management of **532** servers in the Group Active Directory.

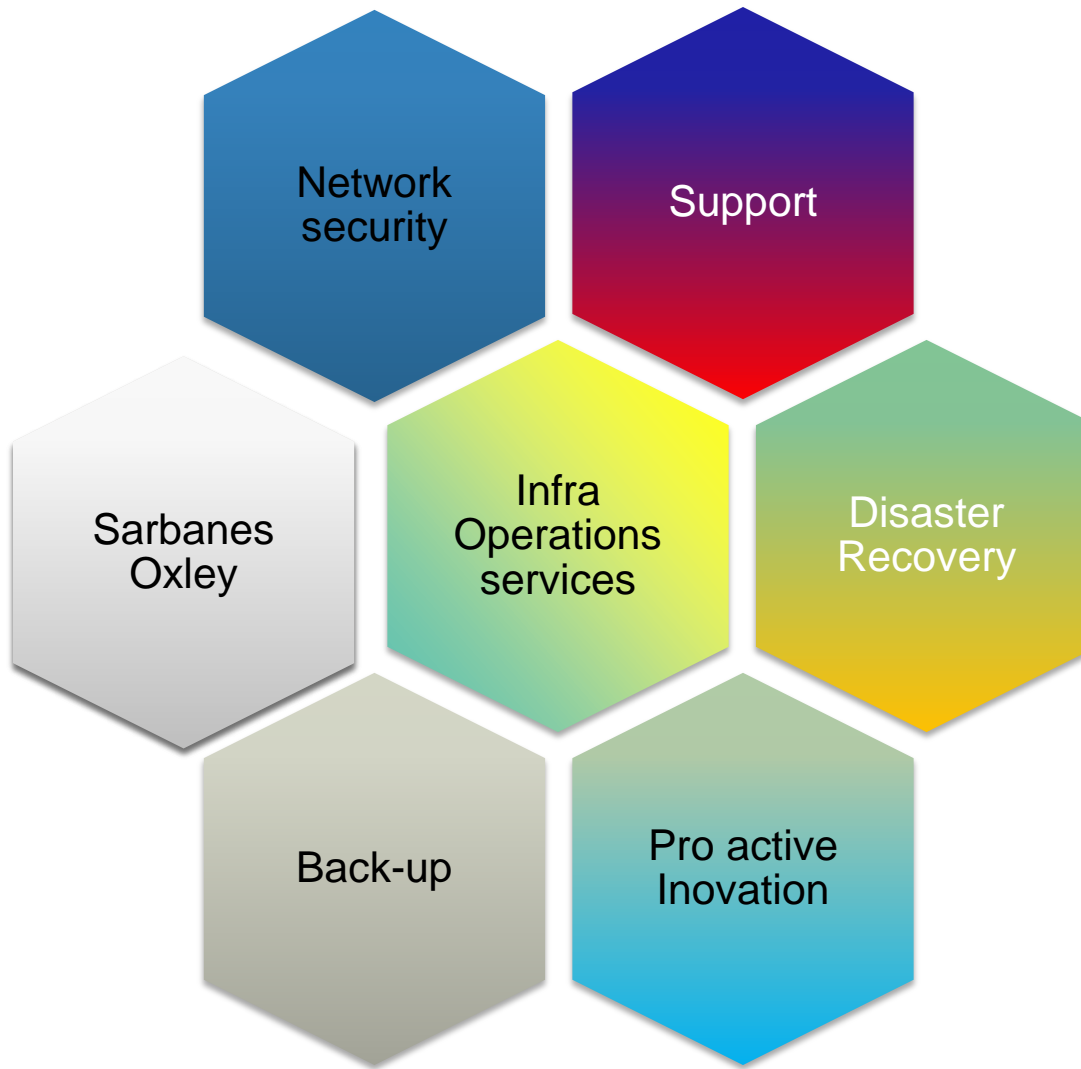

# Scale

- In 2005
  - 6.500 clients
  - 16000 Employees
  - 21 countries in Europe
  - 120 sites
- Currently
  - 18.000 clients
  - 38.000 employees
  - 21 countries in Europe
  - South and Latin America
  - 330 sites
  - Supporting 56 MS Active Directory domains

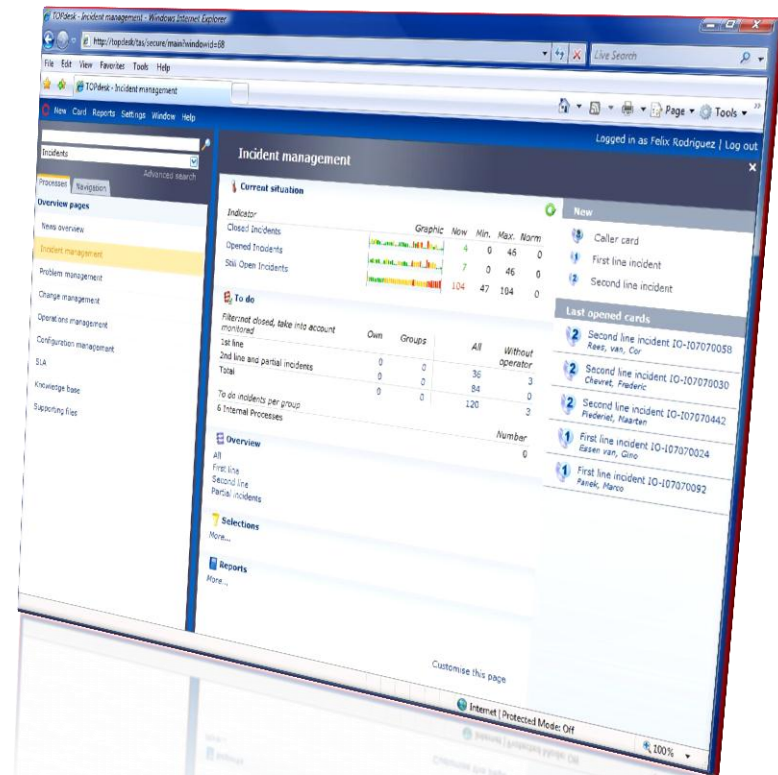

# Services

- Central Directory Infrastructure services
  - Contains services such as Active Directory, certificate services, DNS, WINS, DHCP and NTP.
- The SKG AD forest contains 56 domains and 370 DC's in 292 sites.
- Infra Ops manages 6 central domains with 24 DC's.
  - Assist Opco's with major issues on their domain infrastructure as this has implication throughout the entire forest.
- Representative testing environment

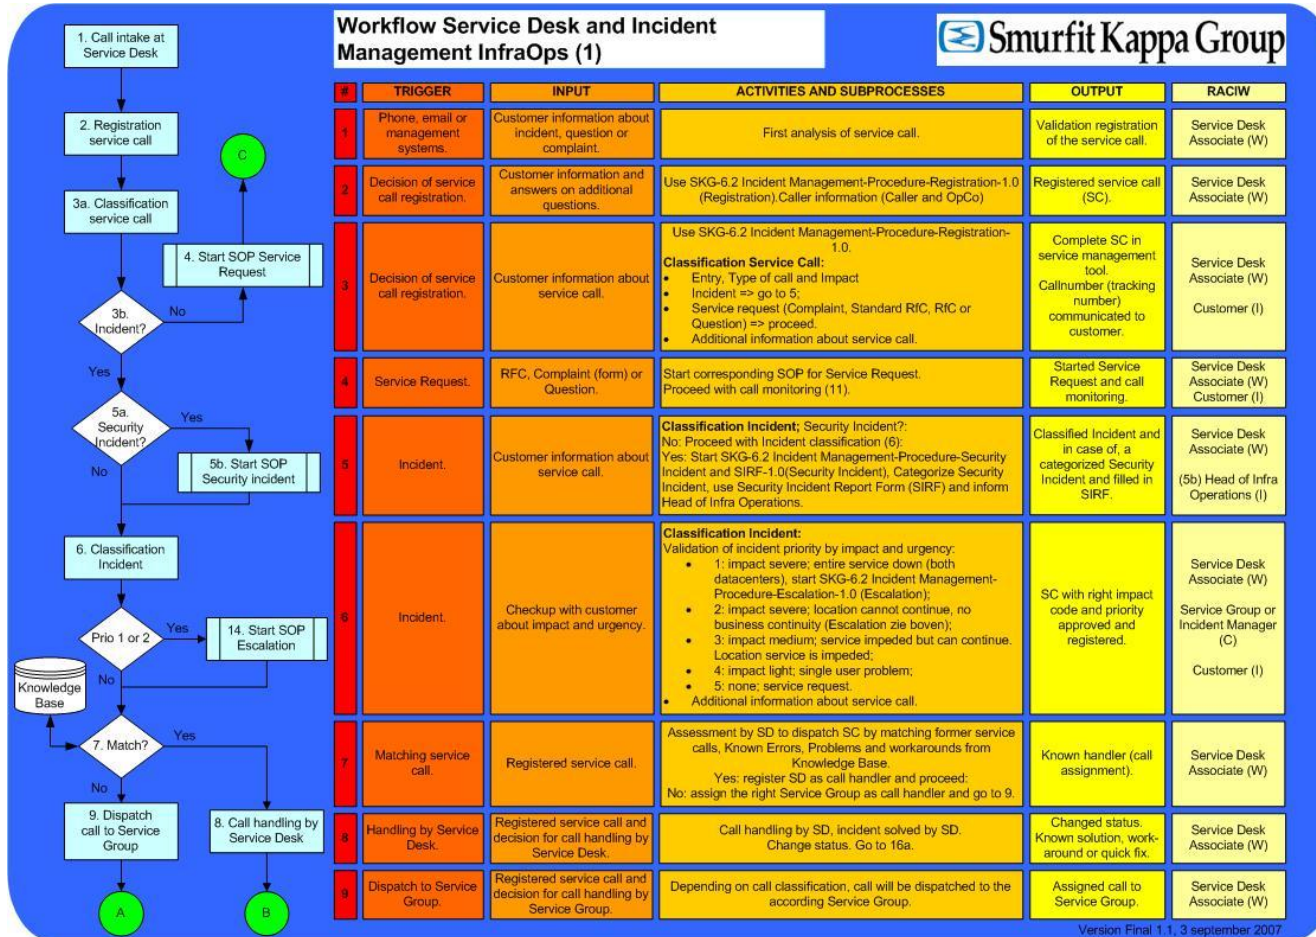

# Support

- TOPdesk
  - [Call registration](#)
  - Streamline operations following COBIT
- ITIL processes
  - [Incident Management](#)  
average of 350 incidents/week
  - Change Management
  - Problem Management

# Smurfit Kappa - Previous Mail Security Solution

Smurfit Kappa is responsible for 50 email domains, which are used in Europe, Russia and South Latin America.

Before Websense integration, Smurfit Kappa was using Appliances from another brand.

Due to high load of monitoring and maintenance of physical security appliances in our datacenters it was necessary to investigate for another Email Security solution.

# Smurfit Kappa – Websense Mail Security Solution

July 2010 Smurfit Kappa started with the implementation of Websense Hosted Email Security.

After running a successful pilot in July 2010, we started with transferring all remaining domains to Websense Hosted Email Security, which was completed in September 2010

# Smurfit Kappa – Websense Mail Security Solution

---

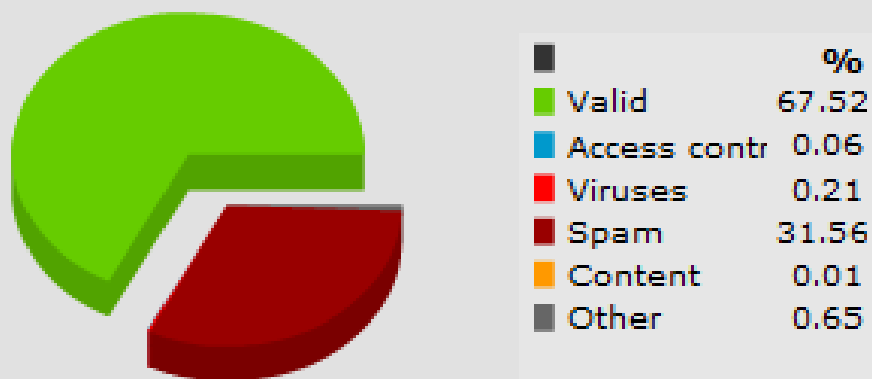

During the next two months after implementation we noticed more email was quarantined than usual, which also contained business information.

After investigation, Smurfit Kappa noticed these email contained unsecure or not allowed content, which were not detected and quarantined by the previous (XYZ) email security.

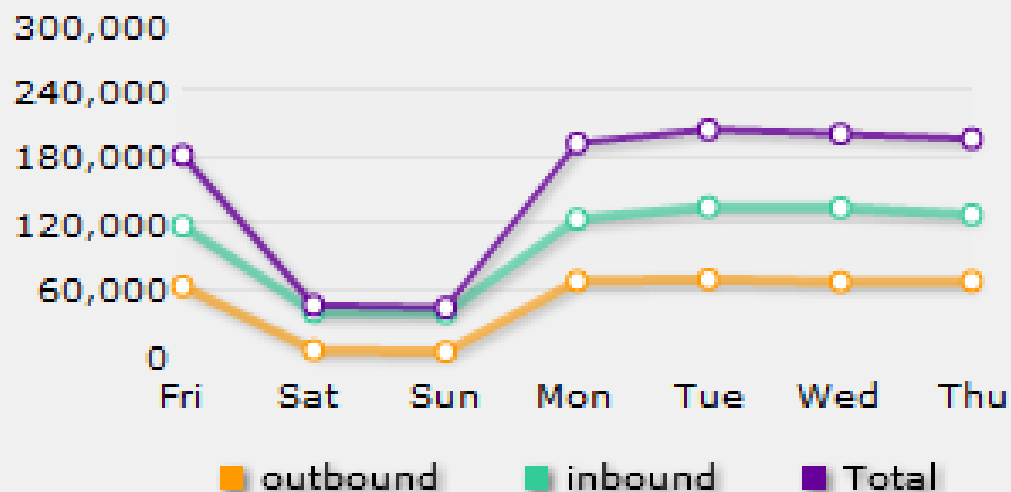

This indicated that the replacement of our old email security appliances was necessary for delivery of a secured environment for all our end users.

# Smurfit Kappa – Websense Mail Security Solution

# Smurfit Kappa – Websense Mail Security Solution

# Smurfit Kappa – Websense Mail Security Solution

# Smurfit Kappa – Websense Mail Security Solution

The positive finding of Websense Hosted Email Security by Smurfit Kappa are:

- Good Support by Websense
- Ease use of Websense HES Portal
- Personal Black and White listing
- Lot of report possibilities, also per domain
- Delegation of control (only per policy)

Options which Smurfit Kappa would like to see in the Websense Hosted Email Security Portal:

- Unique postmaster address per domain in same policy
- Overview of all hidden features which are not available in portal
- Better report layout (management)

# Smurfit Kappa - Previous Web Security Solution

The Smurfit Kappa proxy environment handles approximately 8 million hits a day and filters this traffic based on the website's category and checks for viruses.

Before Websense implementation, Smurfit Kappa was making use of Microsoft ISA 2004 Servers in combination with SurfControl and Trendmicro.

ISA 2004: Rulebase

SurfControl: Content Blocking

Trendmicro: AV Scanning

## **Problems with previous solution:**

- A lot of different product/servers to manage.
- Policies targeted on users/groups not possible.
- Support Contract Trendmicro and SurfControl ending.
- Very limited reporting.

## **Most Important Requirements of new solution:**

- One solution for Proxy, Content Categorization, and Virus scanning.
- Possibility for advanced reporting for management and HRM.
- Policies linked to AD users to allow specific categories for these users.
- Advanced scanning of traffic for Viruses, Adware and other threats.

## Compliance Requirements:

- All Web Traffic must be virus and content scanned.
- All Web Traffic must be logged based on the source IP address of the client and retained for 3 months.
- All Internet facing servers must be placed in a DMZ
- **Decision for Websense was made after a successful Proof Of Concept in September 2009.**

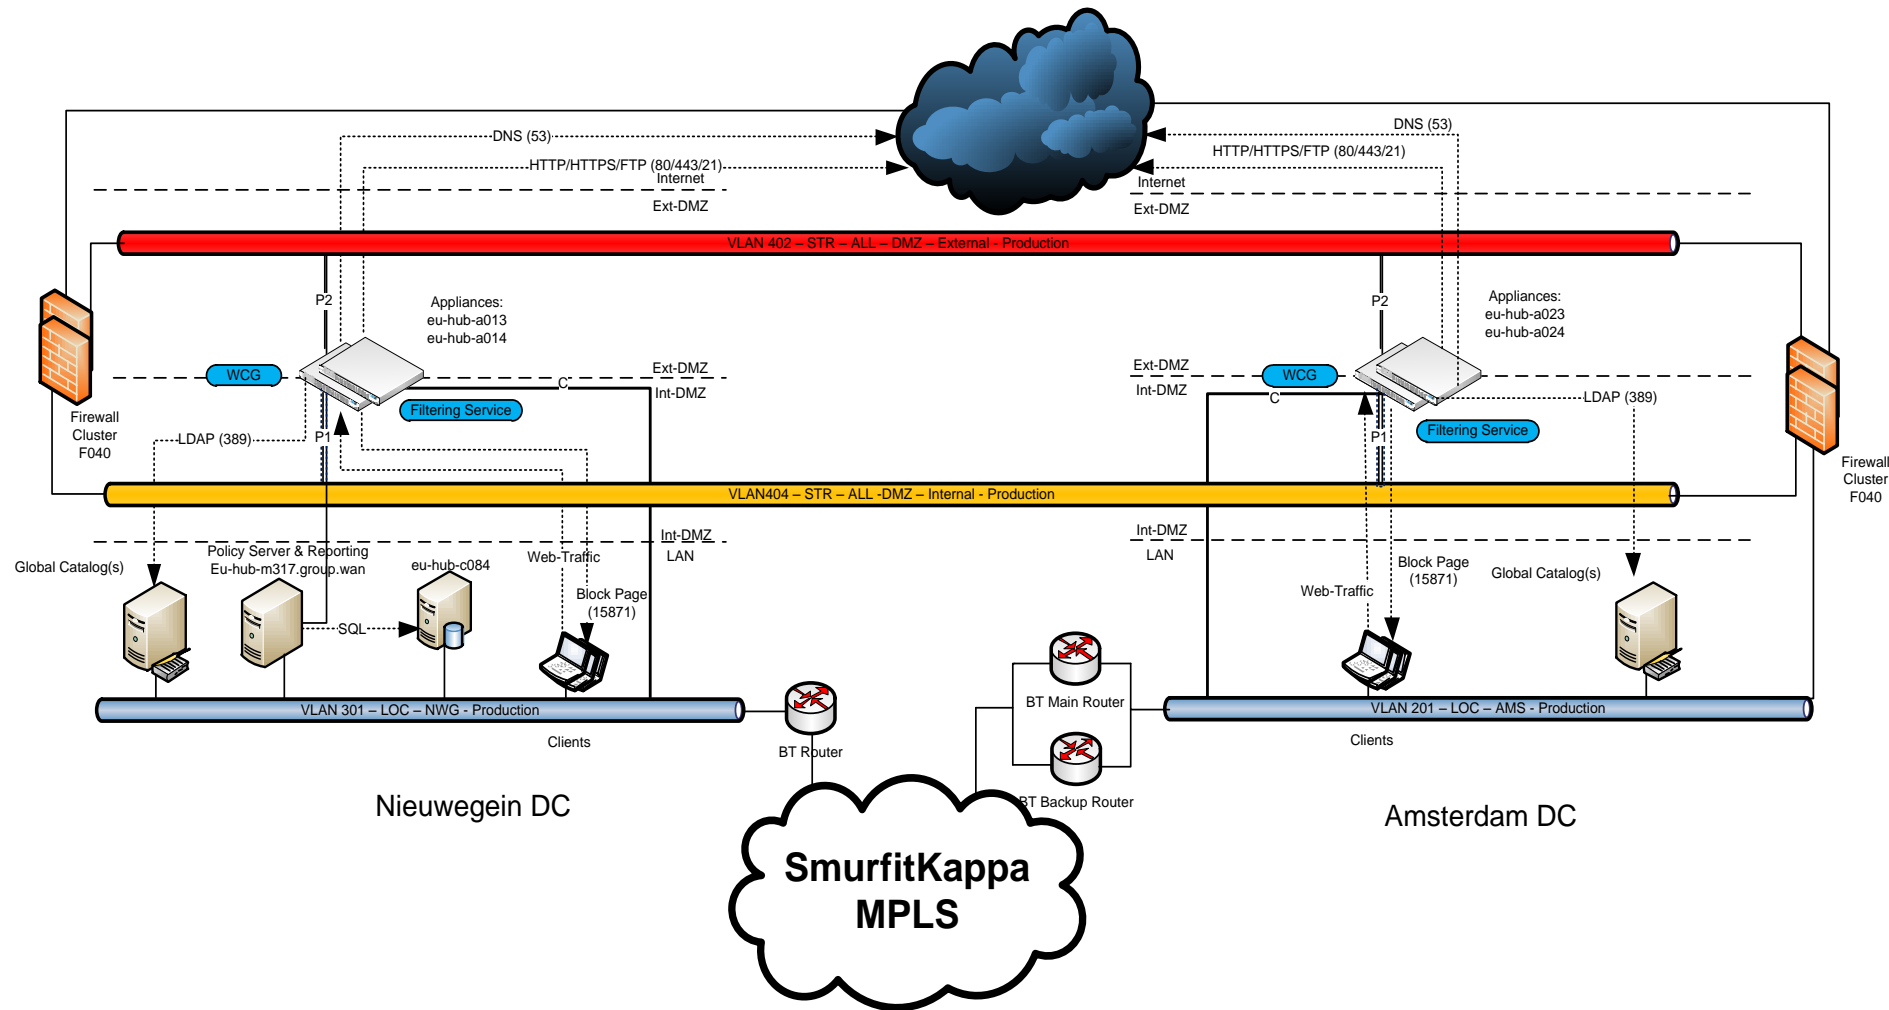

# Smurfit Kappa – Websense Web Security Solution

Smurfit Kappa needed a high available solution which was capable of handling the current web traffic and allows for future growth.

- 4 Websense V10K appliances
  - 2 in Datacenter Amsterdam (Active/Passive cluster)
  - 2 in Datacenter Nieuwegein (Active/Passive cluster)  
(initial setup)
- 1 Windows Server which serves as Policy Source and Reporting Server. SQL instance on SQL cluster used

# Smurfit Kappa – Websense Web Security Solution

## **Roll out of new proxy solution was started at the end of 2009:**

- Roll out was done per Country, each group of countries switched over to the new solution in another week.
- Roll out was done by changing the PAC file on the clients by local IT departments.

## **Results after roll out:**

- Users did not notice much difference, which was a good thing.
- More websites blocked then before which was the result of stricter policies.
- Too much log data, database server disks were filled quickly.
  - Solution: Record domain of URL only, not the full URL.

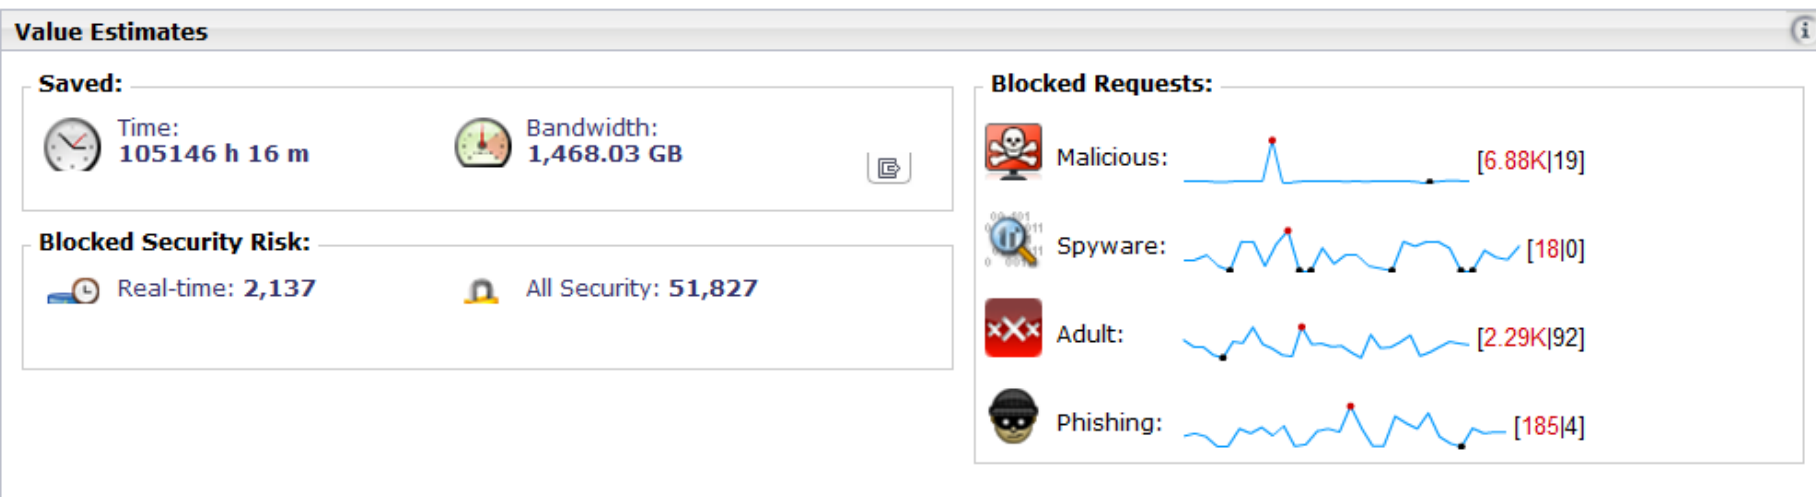

Since the implementation the following has changed:

- Proxy Authentication now done by (Legacy) NTLM.
- Websense Appliance in Miami added for SLA countries. Appliance uses same Policy Source as central appliances.
- Cluster configuration has changed because of changes to the datacenter network:
  - Both appliances in Nieuwegein Active, appliances in Amsterdam passive.

# Smurfit Kappa – Websense Web Security Solution

## Overview of Last 30 days

# Smurfit Kappa – Websense Web Security Solution

## Top Blocked categories at Smurfit Kappa

Many requests are blocked at Smurfit Kappa which saves a lot of time.

Top Blocked categories are:

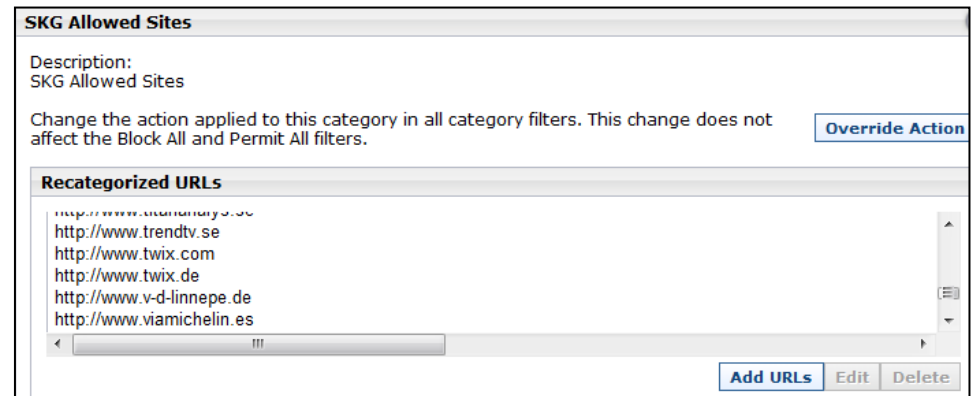

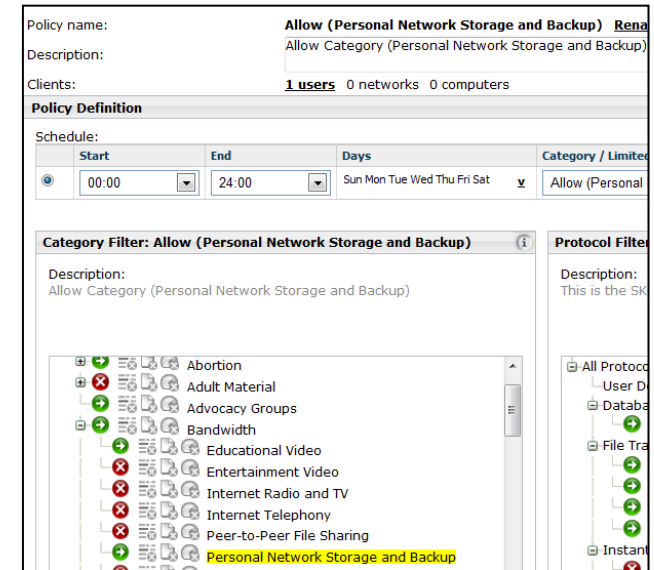

- Social Networking
- Streaming Media
- Personal Network Storage

# Smurfit Kappa – Websense Web Security Solution

Smurfit Kappa allows the following exceptions:

- Opening specific website categories for a user.
  - For each category which can be requested to open, a new policy was made. A Universal Security Group is linked to each policy in which users can be placed.
- Opening a specific website for everyone.
  - A custom Allow category was made for this in which sites which would normally be blocked are placed.

To do:

- Switch Authentication method to Windows Integrated Authentication to be able to use new Windows Server 2008 R2 Domain Controllers and NTLMv2.
- Delegated Administration and Reporting for IT Administrators.
