# New in this version

Release Notes | AMD OP | v1.1 | 20-May-2019

This release of Advanced Malware Detection On-Premises contains the following new features.

## Storing files after analysis

---

You can now store artifacts submitted by your Forcepoint Email Security or Forcepoint Web Security products locally on your Advanced Malware Detection On-Premises Manager.

To enable the setting, see the procedure in the [Advanced Malware Detection On-Premises Manager Installation Guide](#).

## Configuring the memcache timeout setting

---

In Advanced Malware Detection On-Premises v1.1, the memcache timeout setting can be configured by the customer. In Advanced Malware Detection On-Premises v1.0, this value was set to 5 minutes and could not be adjusted.

To configure the setting, see the procedure in the [Advanced Malware Detection On-Premises Manager Installation Guide](#).

# Resolved and known issues

Release Notes | AMD OP | v1.1 | 20-May-2019

A list of resolved and known issues is available in the [Forcepoint Knowledge Base](#). You must log on to My Account to view the list.
