New in this version

Release Notes | AMD OP | v1.1.1 | 3-Sept-2019

This release of Advanced Malware Detection On-Premises contains the following new feature.

Updated manager and sandbox images

Advanced Malware Detection On-Premises v1.1.1 contains an updated version of the Lastline Manager (v1056) and updated sandbox images from Lastline for new deployments.

This release is intended for new customers completing a new Advanced Malware Detection On-Premises installation. Customers who have already upgraded to v1.1.0 do not need to upgrade to v1.1.1. Customers on v1.1.0 should already have access to the latest sandbox images in the Advanced Malware Detection On-Premises Manager UI.

Resolved and known issues

Release Notes | AMD OP | v1.1.1 | 3-Sept-2019
