Release Notes for Websense® TRITON® AP-DATA Gateway and Discover v8.0.1

Topic 41120 / Updated: 1-Jun-2015

Applies To:	Websense TRITON AP-DATA v8.0.1

Version 8.0.1 of Websense TRITON AP-DATA is a maintenance release that resolves several customer issues and offers a few new features, such as:

◆ *Policy and classifier changes*, page 2
◆ *New SIEM syslog output*, page 2

For information about TRITON AP-ENDPOINT DLP (formerly data endpoint) changes, refer to the TRITON AP-ENDPOINT Release Notes.

Introducing
Websense® TRITON® AP-DATA v8.0.1

Applies To:	Websense TRITON AP-DATA v8.0.1

What's new in v8.0.1

Policy and classifier changes

In this release, several changes were made to improve the efficacy of predefined policies and classifiers:

- SSN classifiers have a deeper context awareness
- New IBAN policies and extended support for additional countries and territories
- Norwegian Personal Numbers can be masked
- Additional rules in Suspected Mail to Self policy
- New Deep Web URLs policies

New SIEM syslog output

Additional fields have been added to incident syslog messages sent to SIEM tools using HP ArcSight CEF format. The new fields are listed below:

```
severityType=MEDIUM sourceHost=MNG_ENDPOINT_1
productVersion=8.0 maxMatches=6 timeStamp=2015-03-11
16:33:48.333 destinationHosts=ACCOUNTS.GOOGLE.COM,10.0.17.2
apVersion=8.0
```

where:

- severityType = incident severity (low, medium, high)
- sourceHost = hostname or IP address of incident source
- productVersion = version number of TRITON AP-DATA product (e.g., 8.0)
- maxMatches = maximum number of violations triggered by any given rule in the incident.
- timeStamp = date and time of incident (e.g., 2015-04-30 16:33:48.333)
- destinationHosts = hostnames, IP addresses, or URLs of incident destinations
- apVersion = AP-DATA version number

See the Data Security Manager Help for more information.

Requirements

Topic 41120 / Updated: 1-Jun-2015

Applies To:	Websense TRITON AP-DATA v8.0.1

Operating system support

For the operating system requirements of TRITON AP-DATA modules see the [Deployment and Installation Center](#) in the Websense Technical Library, and click Data.

Hardware requirements

See the [Deployment and Installation Center](#) in the Websense Technical Library for TRITON AP-DATA hardware requirements. Requirements are listed for each TRITON AP-DATA module.

Backward compatibility

As described in the sections below, TRITON AP-DATA v8.0.1 can support older supplemental servers, agents, and endpoints.

You must upgrade other TRITON AP-DATA components to v8.0.1 however.

Supplemental servers

The TRITON management server v8.0.1 is fully compatible with Data Security supplemental servers v7.7.x and later.

Agents

Starting with v8.0, TRITON AP-DATA no longer supports the SMTP, ISA, and printer agents, new or existing.

The FCI, TMG, and mobile agents must be at v8.0.1 to work with v8.0.1 of the management server.

Crawlers and protectors can be running version 7.7.x or later.

Endpoint

TRITON AP-DATA v8.0.1 can support older endpoint versions if you upgrade your management server rather than un-install and re-install it from scratch.

Version 7.7.x and 7.8.x endpoints are fully compatible with the v8.0.1 management server. They can accept new policies, classifiers, profiles, incidents, fingerprint updates, and status notifications. To take advantage of new features, however, they must be upgraded to v8.0.1.

Version 8.0.1 does not support v7.6.x endpoints or earlier.

Websense Content Gateway

Websense Content Gateway includes an on-board DLP policy engine. Content Gateway must be at v7.8.2 or later to work with TRITON AP-DATA v8.0.1.

Email Security Gateway

Email Security Gateway includes an on-board DLP policy engine. Content Gateway must be at v7.8.2 or later to work with TRITON AP-DATA v8.0.1.

Installation and Upgrade

Topic 41120 / Updated: 1-Jun-2015

Applies To:	Websense TRITON AP-DATA v8.0.1

> **Important**
> Prior to starting an installation or upgrade process, make sure that the TRITON service account's password does not contain any of the following special characters.
>
> ◆ <
> ◆ >
> ◆ &
> ◆ |
>
> Read this KB article for instructions on updating the service account password.

New installation

A step-by-step guide to installing TRITON AP-DATA can be found here:

◆ [Installing TRITON AP-DATA v8.0.x](#)

Before you begin, open Windows Control Panel and verify that the "Current language for non-Unicode programs" in the Administrative tab of the Region and Language settings is set to English. After the installation, you can change it back to the original language.

Upgrading TRITON AP-DATA

You can upgrade to Websense TRITON AP-DATA v8.0.1 directly from v7.8.x. If you have an earlier version, however, there are interim steps to perform. These are shown in the table below.

Your current version	Step 1	Step 2	Step 3	Step 4
7.1.x	Migrate to 7.6.0	Upgrade to 7.7.2	Upgrade to 7.8.4	Upgrade to 8.0.1
7.5.x	Migrate to 7.6.0	Upgrade to 7.7.2	Upgrade to 7.8.4	Upgrade to 8.0.1
7.6.x	Upgrade to 7.7.2	Upgrade to 7.8.4	Upgrade to 8.0.1	
7.7.x	Upgrade to 7.8.4	Upgrade to 8.0.1	none	
7.8.x	Upgrade to 8.0.1	none	none	
8.0.0	Upgrade to 8.0.1	none	none	

Step-by-step guides to upgrading your Data Security installation can be found here:

◆ [Upgrading to TRITON AP-DATA v8.0.x from v7.8.x](#)
◆ [Upgrading from v7.7 to 7.8](#)
◆ [Upgrading from v7.6.x to 7.8.x](#)
◆ [Migrating from v7.5.x to 7.8.x](#)

Resolved and known issues
