Quick Start Poster

Forcepoint V5000 G4
TRITON AP-DATA Appliance (HTTP monitor only)

⚠ Before you begin...

Install the TRITON management server and ensure it is operational.

The appliance supports the following security modes:
- Protector (can be deployed in monitoring mode)
- Mobile agent

Plan your deployment before setting up the appliance. See the back of this poster for a deployment overview and reference sheet.

1 Verify Contents

Power Cable

Null Modem Cable

Ethernet Cables (4)

Bezel (faceplate)

Contact Forcepoint Technical Support if any items are missing.
2 Rack Installation

To rack the V5000 appliance, use a rack tray (not included).

1. Obtain a rack tray and install into desired server rack.

2. Place appliance on tray and secure to server rack using mounting screws on front of appliance.
3 Connect Network Cables

Connect the appliance interfaces required by the security mode for this appliance. The default configuration is shown below.

Cat 5E cables (or better) are required. Do not use crossover network cables.

	Protector (Monitoring)	Mobile Agent
Required Ports:	C	C
Optional Ports:	P1 P2 N	P1 P2 N

Legend: C = em1   N = em2   P1 = p2p2   P2 = p2p1

Mode	Interface	Function
Protector	C P1 P2 N	• Required. Management server port.* • Optional**. Can monitor separate networks through a TAP. • Optional**. Can monitor separate networks through a TAP.
Mobile Agent	C P1 P2 N	• Required. Management server port.* • Optional. Can connect to separate networks (LAN, WAN, or DMZ)***. • Optional. Can connect to separate networks (LAN, WAN or DMZ)***.

* Receives connections from the TRITON management server. Provides communication and management for the appliance.

** Although these interfaces are optional, at least one must be configured.

*** Allows mobile devices to access the appliance from internal, hotspot, and home networks.

4 Connect Input Device & Power On

Serial Port Connection   *OR*   **Keyboard/Monitor Connection**

Connect a computer to serial port using null modem cable (provided). Or, connect a terminal server to serial port using a straight-through cable (not provided). Serial port settings are: 9600 baud, 8 bits, no parity.

Connect a monitor and keyboard to appliance, either directly or through a KVM (keyboard/video/mouse) switch.

Power on the appliance and check the following indicators:

Front
- Power button is illuminated.

Rear
- LEDs for connected network interfaces (NICs) are green.
- System status indicator (LED left of power supplies) is solid blue.

Contact Forcepoint Technical Support if any indicators are not illuminated correctly.

5 Installation Steps

1. After the power is on, you are prompted for a user name and password.
   Enter *admin:admin* for the protector.
   Enter *root:admin* for the mobile agent.

2. Start the configuration wizard:
   An installation wizard starts automatically for the protector.
   For the mobile agent, type "wizard" and press **Enter**.

3. Follow the prompts to complete the wizard.

Please refer to the **Deployment and Installation Center** in the Forcepoint Technical Library for more details.

6 Getting the Latest Updates

1. Log on to My Account and navigate to the Downloads page.

2. Download the upgrade script for the latest version of the TRITON AP-DATA Protector and Mobile Agent.

3. Log on to the TRITON AP-DATA appliance as "root".

4. Copy the update script to /opt/websense/data.

5. Enter the following command:
   `chmod +x /opt/Websense/data/<protector-update-scripts-file-name>`

6. Run the following command:
   `bash /opt/websense/data/<protector-update-script-file-name>`

7. Enter **Y**, then complete the wizard, and accept the defaults.

7 Configuration Overview

1. Open a browser...
   a. URL= https://<management server IP>:9443/triton
   b. User name = admin
   c. Enter the password set by the administrator.

2. Select the Data tab.

3. If prompted, enter your subscription key.

4. Navigate to **Main > Status > Dashboard** or **Main > Status > Today**. If the Health Alert Summary lists missing essential configurations, click the link for details and set up remaining configurations.

5. Navigate to **Settings > Deployment > System Modules**.

6. Double-click the protector or mobile agent and configure it.

7. Configure Policies.

8. Click **Deploy**.

Please refer to the Data Security Manager Help system for details.

Appliance Deployment Overview

You can deploy one or more appliances in your network. The diagram below illustrates a basic appliance deployment. Deployment modes include: Protector or Mobile Agent. A separate computer with Windows Server 2008 R2 or Windows Server 2012 or 2012 R2 is required for running the TRITON Manager. See the **Deployment and Installation Center** for details.
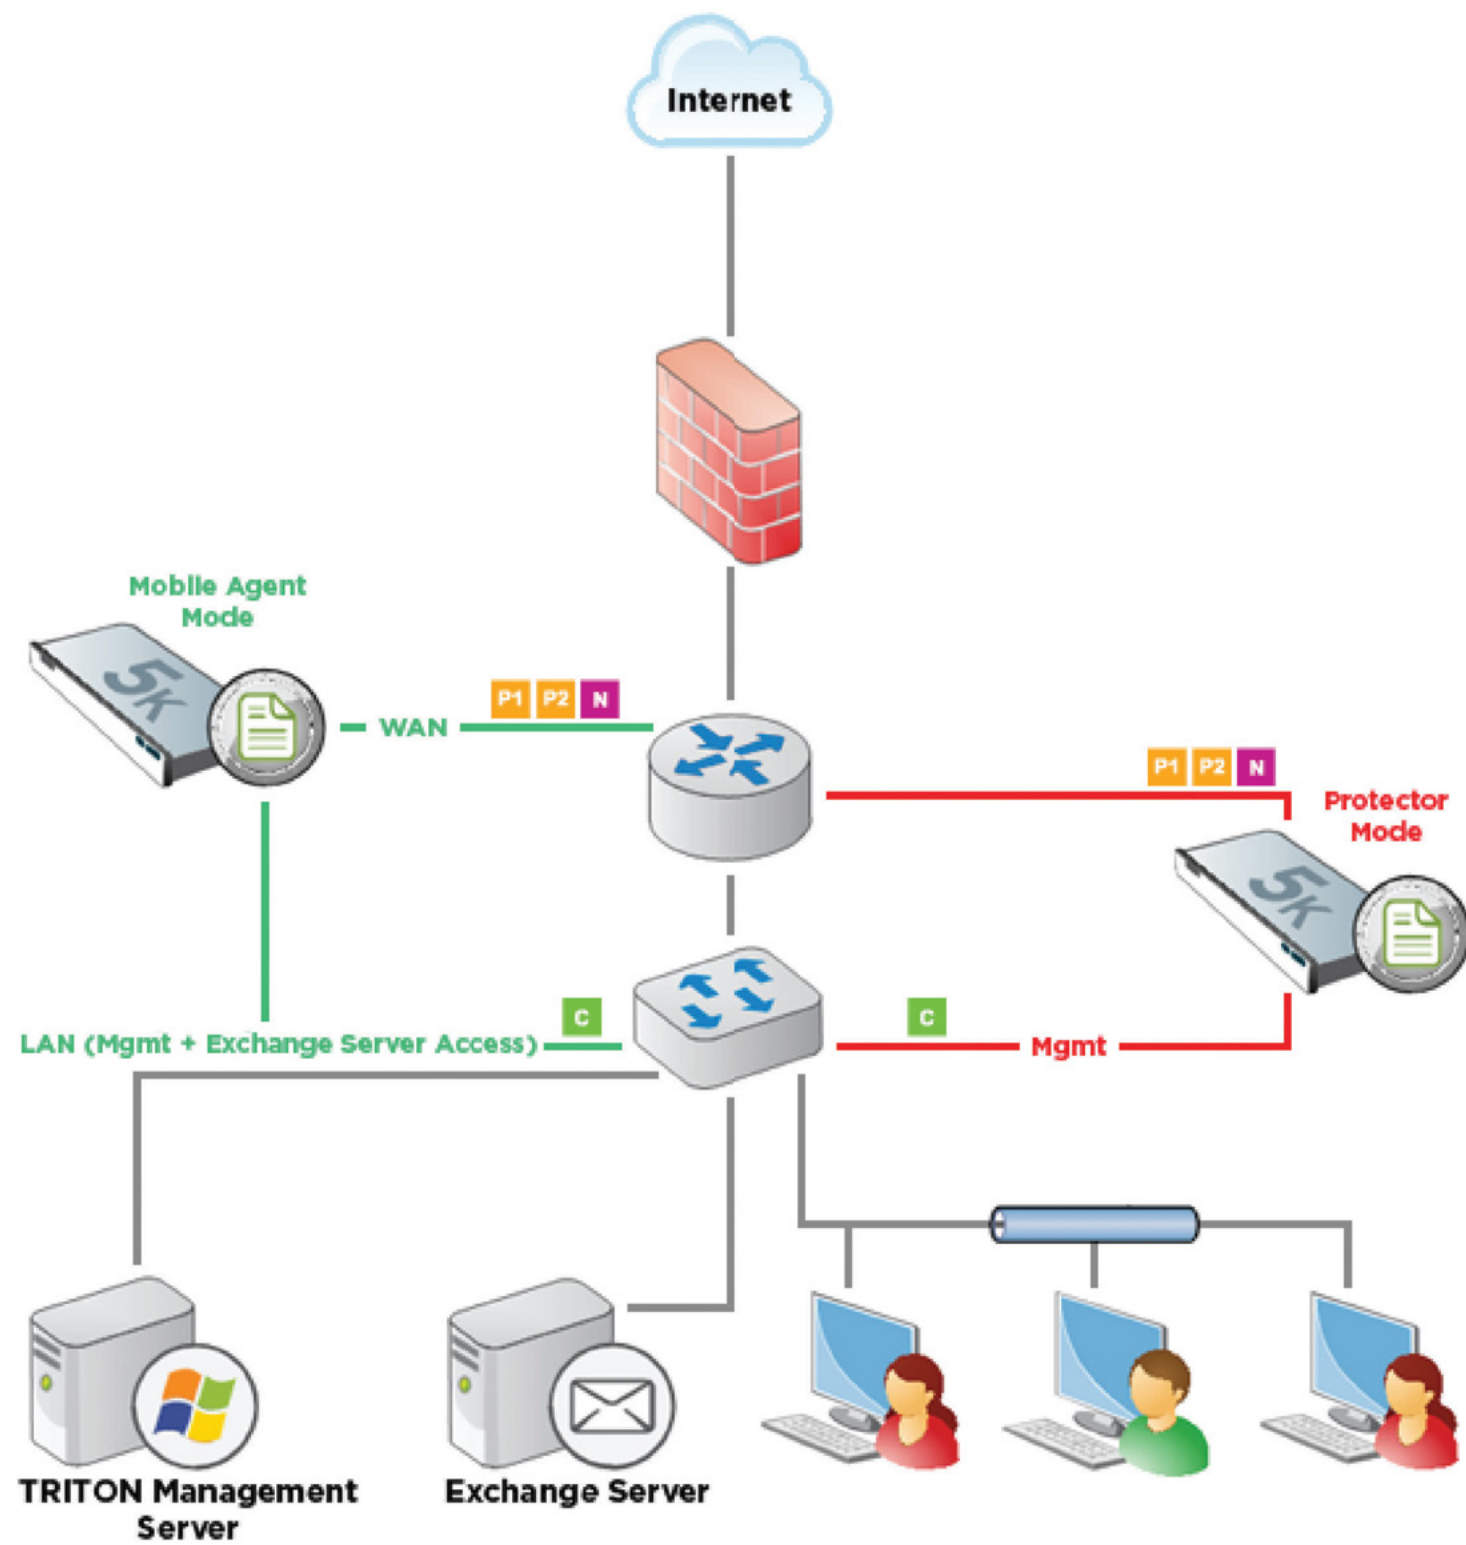

Installation Reference Sheet

Appliance Information

'root' user password: _____   Domain name: _____

'admin' password: _____

Host name: _____

FQDN required for Mobile Agent mode.

Appliance NICs

Interface	Purpose	IP	Gateway	Broadcast
C				
		Subnet Mask		
N				
		Subnet Mask		
P1				
		Subnet Mask		
P2				
		Subnet Mask		

TRITON AP-DATA Server Information (optional)

IP address or FQDN: _____

Required if connecting the protector or mobile agent to a TRITON AP-DATA server. This can be the TRITON management server or a supplemental server.

TRITON Manager

User name (admin by default): _____   Password: _____

Subscription key: _____
