FORCEPOINT

Release Notes

Forcepoint Endpoint Context Agent

1.1.0

Contents

About this release

This is the first release of the Forcepoint Endpoint Context Agent (Forcepoint ECA) software and the Executable List Tool. This document contains important information about the current release. We strongly recommend that you read the entire document.

Forcepoint ECA is a client application monitoring tool. It intercepts network system calls on Windows endpoint machines and provides user and application information to the Forcepoint Next Generation Firewall (Forcepoint NGFW).

The Executable List Tool generates a list of all executable files installed on an endpoint machine. The list is used in the Forcepoint NGFW policy to identify the permitted executable files.

The Executable List Tool is a stand-alone tool and is not included in the Forcepoint ECA installation package. For detailed information about obtaining and running the Executable List Tool, see the [Executable List Tool Guide](#).

System requirements

Forcepoint ECA is compatible with several Microsoft Windows operating systems.

Windows endpoint machine requirements:

- Windows 10
  - x64 and 86 (Pro and Enterprise)
- Win 8/8.1 with [KB2999226](#)
  - x64 and 86 (Pro and Enterprise)

- Win 7 SP1 with [KB3033929](#) and [KB2999226](#)
  - x64 and 86 (Pro, Enterprise, and Ultimate)

Windows Server requirements:

- Windows Server 2012
- Windows Server 2016

Build version

Forcepoint ECA 1.1.0 for Windows build version is 5134.

The Executable List Tool build version is 5013.
