

2015 Release 3 Notes for Websense Cloud Email Protection Solutions

TRITON AP-EMAIL with Email Cloud Module | 11-June-2015

2015 Release 3 of our cloud email protection product includes the following product corrections.

Resolved issues in this release

- ◆ Directory synchronization was failing when a new group was synchronized with a duplicated DN, but different CN and GUID.
- ◆ End-user message reports no longer fail if the report request is for a subscriber with no email addresses. A warning message appears instead.
- ◆ Email addresses containing the ' character can now be subscribed to end-user message reports.
- ◆ Non-delivery reports contained an 8-bit character in the "Received" header. This is illegal according to RFC-822 and was causing some MTAs to reject the message as spam.

Technical Support

Websense provides technical information about Websense products online 24 hours a day, including:

- ◆ latest release information
- ◆ searchable Knowledge Base
- ◆ show-me tutorials
- ◆ product documents
- ◆ tips
- ◆ in-depth technical papers

Note your case number.

Third-Party Software Notice

Websense, Inc., provides software solutions that integrate with your existing environment. In the complex environments that are common in today's marketplace, this involves interacting with a variety of third-party software products. In some cases, Websense, Inc. makes an effort to simplify the acquisition of this third-party software. However, you must obtain any upgrades and enhancements to those products directly from the third-party vendor.

If you have questions, contact Websense Technical Support for additional information.
