

Release Notes for Forcepoint Web Security Proxy Connect Endpoint for Mac (Build 2733)

Updated 14-Dec-2017

Applies to:	Forcepoint Web Security Cloud
--------------------	-------------------------------

This updated release of the Forcepoint Web Security Proxy Connect Endpoint for Mac, known as build 2733, is an update of the previously released TRITON AP-ENDPOINT Proxy Connect Endpoint for Mac, build 2419.

Use this release if:

- You plan to upgrade your Mac endpoints to macOS 10.12.x.
 - You are a brand-new Forcepoint Web Security (formerly TRITON AP-WEB) cloud customer.
- or:
- You have deployed an earlier Forcepoint Web Security Proxy Connect Endpoint release in your organization, and one or more of the fixes in this release are important to you.

You do not need to use this release if:

- You do not plan to upgrade your Mac endpoints to macOS 10.12.x.
- or:
- You have deployed an earlier Forcepoint Endpoint release and all is going well.

Use these Release Notes to learn what's new and improved in this version of Forcepoint Endpoint solutions.

- [Installation and upgrade](#)
- [Resolved and Known issues](#)

For a full list of supported browsers and operating systems for each endpoint version, see the [Certified Product Matrix](#).

New in this version

Updated 14-Dec-2017

Applies to:	Forcepoint Web Security Cloud
--------------------	-------------------------------

Product renaming

Forcepoint has introduced a simplified and more descriptive product and component naming scheme. TRITON AP-ENDPOINT Web will now be known as **Forcepoint Web Security Endpoint**, and this specific type of Forcepoint Web Security Endpoint will now be known as **Forcepoint Web Security Proxy Connect Endpoint**.

The Installer and Diagnostics Tool have been updated to reflect these product name changes.

Key additional product name changes include:

Old Name	New Name
TRITON AP-WEB	Forcepoint Web Security
Web Filtering & Security	Forcepoint URL Filtering
Cloud TRITON Manager	Forcepoint Security Portal
TRITON AP-EMAIL	Forcepoint Email Security
TRITON Settings	Global Settings

Support for macOS 10.12.2, 10.12.3, 10.12.4, 10.12.5, and 10.12.6 (Sierra)

Forcepoint Web Security Endpoint can now run on the macOS operating systems 10.12.2, 10.12.3, 10.12.4, 10.12.5, or 10.12.6.

Also, Mac Mail 10.3, which was introduced with macOS 10.12.4, is supported.

Note

- This Forcepoint Web Security Endpoint release does not support macOS 10.12.1; however, it does support Mac OS X 10.10.x, Mac OS X 10.11.x, macOS 10.12.0, and macOS 10.12.2 and higher.
- This Forcepoint Web Security Endpoint release does not support the macOS 10.13.0 and 10.13.1 (High Sierra) operating systems.

Support for latest browsers

Browsers are tested with existing versions of endpoint solutions when they become available. For a full list of supported browsers and operating systems for each endpoint version, see the [Certified Product Matrix](#).

Installation and upgrade

Updated 14-Dec-2017

Applies to:	Forcepoint Web Security Cloud
--------------------	-------------------------------

For information on configuring and deploying the endpoint software, see:

- [Forcepoint Security Portal Help](#)

For information on how to install and uninstall the endpoint client software, see:

- [Installation and Deployment Guide for Forcepoint Endpoint Solutions](#)

A step-by-step guide to upgrading TRITON AP-ENDPOINT can be found here:

- [Upgrading Forcepoint Endpoint Solutions](#)

For information on using the endpoint client software, see:

- [End User's Guide for Forcepoint Endpoint Solutions](#)

Resolved and Known issues

Updated 14-Dec-2017

Applies to:	Forcepoint Web Security Cloud
--------------------	-------------------------------
