Release Notes for TRITON® Mobile Security 2012 Release 8
Topic 42521 / Updated: 24-Oct-2012

Applies To:	TRITON Mobile Security

Use the release notes to find information about TRITON® Mobile Security Release 8. The release notes include:

- *What's new in TRITON Mobile Security?*
- *Resolved and known issues*

> **❗ Important**
>
> Due to enhancements and corrections made to the Mobile Security enrollment server, devices must re-register with the system to avoid service interruption. To initiate this, administrators should:
>
> 1. Delete all user devices from the Cloud Security portal. (**General > Devices > Delete**)
> 2. Re-send notifications inviting users to register their devices. (**General > Devices > Register New Device**)

What's new in TRITON Mobile Security?

Topic 42522 / Updated: 24-Oct-2012

Applies To:	TRITON Mobile Security

Release 8 addresses several customer issues and offers stability and performance improvements. In addition, it introduces these new features:

- More email notifications for events
- New email configuration options

Event notification

Administrators are now notified of events that may adversely affect their enterprise security. For example, email notifications are sent:

- When high priority jobs are deleted from the job queue, including:
  - Install VPN profile
  - Install Settings profile
  - Remote wipe
  - Remove VPN profile
  - Remove MDM profile
  - Remote Clock
  - Clear Passcode

  The notification includes details about the job. Administrators can verify the device status and decide to ignore the tasks or reinitiate them.
- When an APN certificate is about to expire
- When profile installation fails
- When profile updates fail

As in earlier releases, administrators are also notified when someone removes a Websense profile from his or her mobile device.

Email configuration options

Two new options have been added to the Add Email Account portion of the Edit Profile screen. You can now:

- Prevent outbound messages from being moved into another account or forwarded or replied to from a different account.
- Prevent accounts from sending email from within third-party applications.

Resolved and known issues
