About this release

Stonesoft Firewall/VPN Express version 5.5.15 is a maintenance version for the Stonesoft Firewall/VPN Express appliance series.

This document contains important information about the current release. We strongly recommend that you read the entire document.

Resolved issues

Problems described in the table below have been fixed in Stonesoft Firewall/VPN Express version 5.5.15. A workaround solution is presented for earlier versions where available.

Issue	Description
OpenSSL library update June and July 2015 (#115961)	The OpenSSL library has been updated to version 1.0.1p to address the issues listed in CVE-2015-1788 and CVE-2015-1789. The engine uses vulnerable OpenSSL routines only for its TLS management communications. The ability to abuse these vulnerabilities is limited as access to vulnerable interfaces is limited by IP address-based access controls.

System requirements

Stonesoft Firewall/VPN appliances

This software version is supported on Stonesoft Express FW-105 FW/VPN appliances only.

Build version

Stonesoft Firewall/VPN Express version 5.5.15 build version is 9922.

Product Binary Checksums

SHA1SUM 4cfbcdbcb12339c6f2e571a9faed54b9ef3c554c

Compatibility

Minimum

Stonesoft Firewall/VPN Express version 5.5.15 is recommended to be used with the following Stonesoft component versions:

- Stonesoft Management Center 5.5.0 or higher
- Stonesoft Dynamic Update 517 or higher

Installation instructions

The main installation steps for Stonesoft Firewall/VPN Express are as follows:

1. Install the Management Server, the Log Servers, and the Management Client to the hosts to be used as the management system. Optionally, you can install the Authentication Server and Web Portal Servers.
2. Configure the Firewall element using the Management Client.
3. Generate an initial configuration for the engines by right-clicking the Firewall and selecting **Save Initial Configuration**.
4. Make the initial connection from the engines to the Management Server and enter the one-time password provided during step 3.
5. Create and upload a policy on the engines using the Management Client.
6. Command the nodes online by right-clicking the firewall and selecting **Commands | Go Online**.

Refer to the *Stonesoft FW-105 Series Appliance Installation Guide* for alternative methods for the initial configuration of the engines.

The detailed installation instructions can be found in the *Stonesoft Management Center Installation Guide* and *Firewall/VPN Installation Guide*. For more information on using the Stonesoft system, refer to the Management Client *Online Help* or the *Stonesoft Administrator's Guide*. For background information on how the system works, consult the *Stonesoft Management Center Reference Guide* and *Firewall/VPN Reference Guide*.

Upgrade instructions

Stonesoft Firewall/VPN Express version 5.5.15 requires an updated license if upgrading from version 5.4.x. The license upgrade can be requested at our website at <https://my.stonesoft.com/managelicense.do>. Install the new license using the Management Client before upgrading the software. The license is updated automatically by the Management Server if communication with Stonesoft servers is enabled and the maintenance contract is valid.

To upgrade the engine, use the remote upgrade feature in the Management Client. Detailed instructions can be found in the *Firewall/VPN Installation Guide*.

Upgrading to any 5.5.x version is only supported from a lower 5.5.x version or from a 5.4.x version. If you are running a lower version, first upgrade to the highest 5.4.x version following the instructions in the release notes for that version.

Note If you have not changed the root password since engine version 4.x, change the root password before upgrading using the sg-reconfigure tool or the Management Client. If the upgrade is done without changing the root password, root login to the engine does not work after upgrading to 5.5.7 or higher until the password has been reset in the Management Client.

It is recommended to change root password in any case, as the salted hash of the root password is stored using a stronger hash (SHA-512) in version 5.5.5 and higher.

Known issues

The current known issues of Stonesoft Firewall/VPN Express version 5.5.15 are described below. For a full and updated list of known issues, consult our website at http://www.stonesoft.com/en/customer_care/kb/.

No known open issues.

Find product documentation

McAfee provides the information you need during each phase of product implementation, from installation to daily use and troubleshooting. After a product is released, information about the product is entered into the online Knowledge Center.

- 1 Go to the McAfee ServicePortal at <http://support.mcafee.com> and click **Knowledge Center**.
- 2 Enter a product name, select a version, then click **Search** to display a list of documents.
