Resolved issues

These issues have been resolved since the release of Forcepoint NGFW 6.6.4. For a list of issues fixed in a previous release, see the Release Notes for the specific release.

Description	Role	Issue number
Repeated SIP invite requests in a SIP connection might prevent NAT for related connections.	FW	NGFW-23756
If there is a large number of DHCP relay interfaces, some of the DHCP relay interfaces might not work correctly.	FW	NGFW-24107
When the NGFW Engine uses file filtering, it might send packets that are larger than the maximum segment size (MSS) on both sides.	FW	NGFW-24224

Description	Role	Issue number
With a large VPN configuration, the VPN process might stop responding during the policy installation, causing the NGFW Engine to restart.	FW	NGFW-24239
SSL VPN tunnel connections might be discarded when a policy is installed.	FW	NGFW-24447

Upgrade instructions

To upgrade the NGFW Engine to version 6.6.4, Hotfix 1, use the remote upgrade feature in the Management Client component of the Forcepoint NGFW Security Management Center (SMC). For details, see the relevant sections in the *Forcepoint Next Generation Firewall Installation Guide*.
