About this release

This document contains important information about the current release of Forcepoint VPN Client for Android (formerly known as Stonesoft VPN Client for Android). We strongly recommend that you read the entire document.

Forcepoint VPN Client for Android is an end-user component for use with the Forcepoint Next Generation Firewall (Forcepoint NGFW) solution. Forcepoint VPN Client provides a secure remote connection to your organization's internal network. Strong encryption prevents eavesdropping and modification of the traffic. Forcepoint VPN Client enables easy and secure remote access to private networks where Forcepoint NGFW is used as a VPN gateway.

System requirements

Forcepoint VPN Client for Android requires Android 5.0 (Lollipop) or later. Forcepoint VPN Client can be installed on both phones and tablets.

Android devices with x86 CPUs are not supported.

CAUTION: This version of the Forcepoint VPN Client for Android removes support for Android devices earlier than Android 5.0 (Lollipop). Do not install this version if you use a device earlier than Android 5.0 (Lollipop).

Build version

Forcepoint VPN Client 2.0.3 build version is 1023.

Compatibility

Forcepoint VPN Client for Android version 2.0.3 is recommended to be used with the following Forcepoint NGFW component versions.

Component	Minimum compatible version	Recommended version
Forcepoint NGFW Security Management Center (SMC)	5.10.0	Latest 6.5.x maintenance version or newer
Forcepoint Next Generation Firewall (Forcepoint NGFW) in the Firewall/VPN role	5.10.0	Latest 6.5.x maintenance version or newer

Enhancements

This release of the product includes these enhancements.

Enhancements in Forcepoint VPN Client 2.0.2 for Android

Enhancement	Description
Rebranding	The name of the product has been changed to Forcepoint VPN Client for Android. The user interface has been updated to reflect the new brand.

Enhancements in Forcepoint VPN Client 2.0.3 for Android

Enhancement	Description
64-bit support	The Forcepoint VPN Client for Android now supports Android devices with 64-bit CPUs.
OpenSSL software libraries updated	The OpenSSL software libraries that are used in the Forcepoint VPN Client have been updated.

Installation instructions

Download and install the Forcepoint VPN Client app from the [Google Play store](#).

To complete the VPN settings with your company-specific details, contact your Forcepoint NGFW administrator.

Known issues

For a list of known issues in this product release, see Knowledge Base article [10235](#).
