About this release

This document contains important information about the current release of Forcepoint VPN Client for macOS. We strongly recommend that you read the entire document.

Forcepoint VPN Client is an end-user component for use with the Forcepoint Next Generation Firewall (Forcepoint NGFW) solution. Forcepoint VPN Client provides a secure remote connection to your organization's internal network. Strong encryption prevents eavesdropping and modification of the traffic. Forcepoint VPN Client enables easy and secure remote access to private networks where Forcepoint NGFW is used as a VPN gateway.

Note: Forcepoint VPN Client for macOS uses the SSL protocol only and by default uses port 443.

System requirements

Forcepoint VPN Client is compatible with macOS version 10.11 (El Capitan) and higher.

Build number and checksums

Forcepoint VPN Client 2.0.4 build number is 191219.

Use the checksums to make sure that the installation files downloaded correctly.

```
    VPNClient-2.0.4.191219.dmg
