# About this release

---

This document contains important information about the current release of Forcepoint VPN Client for macOS. We strongly recommend that you read the entire document.

Forcepoint VPN Client is an end-user component for use with the Forcepoint Next Generation Firewall (Forcepoint NGFW) solution. Forcepoint VPN Client provides a secure remote connection to your organization's internal network. Strong encryption prevents eavesdropping and modification of the traffic. Forcepoint VPN Client enables easy and secure remote access to private networks where Forcepoint NGFW is used as a VPN gateway.

### Note

Forcepoint VPN Client for macOS uses the SSL protocol only and by default uses port 443.

## System requirements

---

Forcepoint VPN Client is compatible with macOS version 12 (Monterey) and higher on both Intel and Apple M1 and M2 based systems.

## Build number and checksums

---

Forcepoint VPN Client 2.0.7 build number is 230713.

Use the checksums to make sure that the installation files downloaded correctly.
