McAfee Next Generation Firewall 5.9.0

McAfee VPN Client for Windows

Contents

About this release

This document contains important information about the current release. We strongly recommend that you read the entire document.

McAfee® VPN Client (VPN Client) for Windows is an end-user component for use with McAfee® Next Generation Firewall (McAfee NGFW). The VPN Client provides a secure remote connection to your company network. Strong encryption prevents eavesdropping and modification of the traffic. The VPN Client provides easy and secure remote access to private networks where McAfee NGFW is used as a VPN gateway.

System requirements

The VPN Client is compatible with several Windows operating systems and needs a specific software environment.

- Use any of these operating systems, 32-bit or 62-bit.

  - Windows 8.1

  - Windows 7 with Service Pack 1

  - Windows Vista with Service Pack 2

- Microsoft .NET Framework 4.5

Build version

The VPN Client version 5.9 for Windows build version is 5.9.0.2906.

Compatibility

The VPN Client is recommended for use with these McAfee NGFW component versions.

Component	Minimum compatible version	Recommended version
Security Management Center (SMC)	5.8.1	Latest 5.9.x maintenance version
McAfee NGFW in the Firewall/VPN role		

New features

This release of the product includes this new feature.

SSL functionality

SSL VPN connections are now supported. Administrators can define the port that is used with the IP address.

Installation instructions

For information about installing or upgrading VPN Client, see the *McAfee VPN Client Product Guide* and *McAfee VPN Client User Guide*.

Known issues

For a list of known issues in this product release, see this McAfee KnowledgeBase article: KB83467.

Find product documentation

After a product is released, information about the product is entered into the McAfee online Knowledge Center.

Task

1   Go to the **Knowledge Center** tab of the McAfee ServicePortal at http://support.mcafee.com.

2   In the **Knowledge Base** pane, click a content source:

   • **Product Documentation** to find user documentation

   • **Technical Articles** to find KnowledgeBase articles

3   Select **Do not clear my filters**.

4   Enter a product, select a version, then click **Search** to display a list of documents.
