About this release

This document contains important information about the current release. We strongly recommend that you read the entire document.

Stonesoft VPN Client for Windows is an end-user component for use with Forcepoint Next Generation Firewall (Forcepoint NGFW). The Stonesoft VPN Client provides a secure remote connection to your company network. Strong encryption prevents eavesdropping and modification of the traffic. The Stonesoft VPN Client provides easy and secure remote access to private networks where Forcepoint NGFW is used as a VPN gateway.

System requirements

The Stonesoft VPN Client is compatible with several Microsoft Windows operating systems and needs a specific software environment.

- Operating systems, 32-bit or 64-bit:
 - Windows 10
 - Windows 8.1
 - Windows 7 with Service Pack 1
- Microsoft .NET Framework 4.5

Build number and checksums

The build number for Stonesoft VPN Client 6.5.0 is 3320.

Use the checksums to make sure that the installation files downloaded correctly.

- Stonesoft-VPN-Client-6.5.0.3320.exe

Compatibility

Stonesoft VPN Client is recommended for use with these Forcepoint NGFW component versions.

Component	Minimum compatible version	Recommended version
Forcepoint NGFW Security Management Center (SMC)	5.8.1	Latest 5.10.x maintenance version or newer
Forcepoint Next Generation Firewall (Forcepoint NGFW) in the Firewall/VPN role	5.8.1	Latest 5.10.x maintenance version or newer

Enhancements

This release of the product includes these enhancements.

Enhancements in Stonesoft VPN Client version 6.5.0

Enhancement	Description
ECDSA support	Stonesoft VPN Client now supports elliptic curve digital signature algorithm (ECDSA) certificates in automated mode, for pre-logon-access provider (PLAP) authentication, and for secure domain logon.

Resolved issues

These issues are resolved in this release of the product. For a list of issues fixed in a previous release, see the Release Notes for the specific release.

Description	Issue number
When you use smart card authentication, the VPN connection is not terminated when you remove the smart card from the reader.	VPN-142
In Windows 7, the VPN Client virtual adapter might try to handle non-IP packets as if they were IPv4 packets. As a result, the VPN tunnel fails almost immediately after the VPN Client connects to the VPN gateway.	VPN-216
Connections to an SSL VPN endpoint fail if the endpoint is reachable through routes other than the default route.	VPN-220
When several certificates with the same Subject Alternative Name are found on the computer where the VPN Client is installed, the VPN Client might select the wrong certificate for certificate-based authentication.	VPN-221

Installation instructions

Install Stonesoft VPN Client 6.5.0 as instructed in the *Stonesoft VPN Client Product Guide* and *Stonesoft VPN Client User Guide*.

Known issues

For a list of known issues in this product release, see Knowledge Base article [16440](#).

Find product documentation
