# About this release

---

This document contains important information about the current release. We strongly recommend that you read the entire document.

Forcepoint VPN Client, formerly known as Stonesoft VPN Client, is an end-user component for use with Forcepoint Next Generation Firewall (Forcepoint NGFW). The Forcepoint VPN Client provides a secure remote connection to your organization's network. Strong encryption prevents eavesdropping and modification of the traffic. The Forcepoint VPN Client provides easy and secure remote access to private networks where Forcepoint NGFW is used as a VPN gateway.

# System requirements

---

The Forcepoint VPN Client is compatible with several Microsoft Windows operating systems and needs a specific software environment.

- Operating systems, 32-bit or 64-bit:
  - Windows 10
  - Windows 8.1
  - Windows 7 with Service Pack 1
- Microsoft .NET Framework 4.5

# Build number and checksums

---

The build number for Forcepoint VPN Client 6.6.0 is 6605.

Use the checksums to make sure that the installation files downloaded correctly.

- Forcepoint-VPN-Client-6.6.0.6605.exe

## Compatibility

Forcepoint VPN Client is recommended for use with these Forcepoint NGFW component versions.

Component	Minimum compatible version	Recommended version
Forcepoint NGFW Security Management Center (SMC)	6.3.0	Latest 6.4.x maintenance version or newer
Forcepoint Next Generation Firewall (Forcepoint NGFW) in the Firewall/VPN role	6.3.0	Latest 6.3.x maintenance version or newer

## Enhancements

This release of the product includes these enhancements.

### Enhancements in Forcepoint VPN Client version 6.6.0

Enhancement	Description
Rebranding	The name of the product has been changed to Forcepoint VPN Client. The user interface has been updated to reflect the new brand.

## Resolved issues

These issues are resolved in this release of the product. For a list of issues fixed in a previous release, see the Release Notes for the specific release.

Description	Issue number
The VPN Client fails to authenticate with IKEv1 when only 3DES is selected as a cipher algorithm in a VPN Profile, such as the VPN-A Suite VPN Profile.	VPN-219
If the certificate for certificate-based authentication is signed by an external ECDSA certificate authority, certificate-based authentication fails.	VPN-237
When the NGFW Engine is in FIPS-compatible operating mode, the VPN Client cannot verify the SHA-2 signature used by the NGFW Engine.	VPN-253
When RSA is used with certificate-based authentication, the VPN Client uses an SHA-1 signature even though the certificate uses SHA-2.	VPN-254
When certificate-based authentication is used, the VPN Client checks all available certificates in the certificate store. If the VPN Client finds a certificate without a SubjectName, the VPN Client stops working.	VPN-257

## Installation instructions

Install Forcepoint VPN Client 6.6.0 as instructed in the *Forcepoint VPN Client Product Guide* and *Forcepoint VPN Client User Guide*.

## Known issues

For a list of known issues in this product release, see Knowledge Base article [16878](#).

## Find product documentation

On the Forcepoint support website, you can find information about a released product, including product documentation, technical articles, and more.

You can get additional information and support for your product on the Forcepoint support website at <https://support.forcepoint.com>. There, you can access product documentation, Knowledge Base articles, downloads, cases, and contact information.

## Product documentation

Every Forcepoint product has a comprehensive set of documentation.

- *Forcepoint VPN Client Product Guide* for Windows

- *Forcepoint VPN Client User Guide* for Windows
- *Forcepoint Next Generation Firewall Product Guide*
- *Forcepoint Next Generation Firewall Installation Guide*
