◆ v7.6.2 Release Notes for Websense Web Security

◆ v7.6.2 Release Notes for Websense Data Security

◆ v7.6.2 Release Notes for Websense Email Security Gateway

◆ v7.6.2 Release Notes for Websense V-Series Appliances

◆ v7.6.2 Release Notes for Websense Content Gateway

Key features in this release

Applies To:	Websense TRITON Unified Security Center 7.6.2

Version 7.6.2 is a maintenance release of Websense TRITON Enterprise. It offers a number of enhancements to the 7.6 release. See the Release Notes for each TRITON module for more information.

Supported browsers

TRITON Unified Security Center is now supported on Firefox 5 in addition to the browsers supported in version 7.6.

Note that other hardware requirements and software support information have not changed from those listed in the Websense TRITON Unified Security Center 7.6 Release Notes.

Installation and upgrade

Topic 45037 / Updated: 12-Aug-2011

Applies To:	Websense TRITON Unified Security Center 7.6.2

To install the TRITON Unified Security Center:

1. Download and launch the Websense installer.
2. Accept the subscription agreement.
3. Select **TRITON Unified Security Center** as the **Installation Type** screen, and click Next.
4. Follow the instructions to install TRITON Infrastructure and the modules in your subscription.

See the Release Notes for each TRITON module for more information.

If you are upgrading from version 7.6, please refer to the 7.6.2 Upgrade Instructions. These are located in the Websense Technical Library on the Websense.com Support site.
