v8.1 Release Notes for TRITON® APX Solutions

Topic 45205 / Updated: 4-August-2015

Applies To:	Websense® TRITON APX Solutions v8.1

Use the Release Notes to find information about what's new and improved in Websense TRITON Manager and management server, Version 8.1.

Contents

◆ *New in TRITON APX v8.1*

◆ *Resolved and Known issues*

Through the TRITON Manager, you can manage TRITON AP-WEB, TRITON AP-DATA, and TRITON AP-EMAIL from the same management application. The following release notes are available for each TRITON product:

◆ v8.1 Release Notes for TRITON AP-WEB

◆ v8.1 Release Notes for TRITON AP-DATA

◆ v8.1 Release Notes for TRITON AP-EMAIL

The release notes below are also available for v8.1:

◆ v8.1 Release Notes for Websense V-Series Appliances

New in TRITON APX v8.1

Topic 45206 / Updated: 4-August-2015

Applies To:	Websense TRITON APX Solutions v8.1

Version 8.1 is a maintenance release that provides a number of features and several important corrections for Websense TRITON APX solutions.

Previous product functionality remains intact. The user interface has the same familiar look and feel and the core product continues to provide the strong protections you've come to rely on.

SQL Server support

SQL Server 2012 SP2 and SQL Server 2014 are supported in this release.

For the full list of supported SQL server versions, see the Websense TRITON APX Installation Guide and Upgrading to TRITON APX Enterprise Core v8.1x.

Supported browsers for TRITON Manager

Support has been added for the latest browsers.

For the full list of supported browsers, see the Websense TRITON APX Installation Guide and Upgrading to TRITON APX Enterprise Core v8.1x.

Password requirements

The password requirements for the default TRITON Manager administrator account (admin) and all other TRITON administrators have changed. Passwords must now:

- Be at least 8 characters
- Contain at least 1 upper case character
- Contain at least 1 lower case character
- Contain at least 1 number
- Contain at least 1 non-alphanumeric character

Audit log updates

The Audit Log under TRITON Settings has been updated in this release. Events are now added to the log in the following cases:

◆ A single administrator permission is added or removed.

◆ Administrator details are modified – i.e. several different permissions are changed and/or check boxes are selected or cleared. Click the link in the event notification to see full details of the changes.

◆ Two-factor authentication is added, removed, or modified.

Deployment

Topic 45207 / Updated: 4-August-2015

Applies To:	Websense TRITON APX Solutions v8.1

Installation for Websense TRITON products in your subscription is performed with a single installer for the TRITON infrastructure and reporting database. From this installer you can launch the installation of the individual TRITON products, as required.

To upgrade to TRITON APX version 8.1, all deployments of TRITON AP-WEB, AP-EMAIL, AP-DATA, Web Filter, Web Security, and Web Filter & Security must be at version 7.8.x or later.

> **Important**
> If you are installing or upgrading Websense software on a Windows 2008 R2 machine that does not have service pack 1 installed, you must update to the Microsoft .NET Framework v4.5 before beginning.

For more information, see the release notes for individual TRITON products, and the Installation Guides and Upgrade Guides in the Websense Technical Library.

See the Websense TRITON APX Installation Guide and the Release Notes for each TRITON product for more information.

Resolved and Known issues

Topic 45208 / Updated: 4-August-2015

Applies To:	Websense TRITON APX Solutions v8.1

A list of resolved and known issues in this release is available to customers with a current MyWebsense account.

If you are not currently logged in to MyWebsense, the link takes you to a login prompt. Log in to view the list.

For lists of known issues and limitations in this release, please see the Release Notes for each TRITON product.
