- ◆ *New in the TRITON APX Suite v8.3*
- ◆ *Resolved and Known issues*

New in the TRITON APX Suite v8.3

Updated: 19-Dec-2016

Applies To:	Forcepoint TRITON APX Solutions v8.3
--------------------	--------------------------------------

Version 8.3 provides new features and corrections for Forcepoint TRITON solutions.

To learn what's new in TRITON AP-WEB, TRITON AP-DATA, and TRITON AP-EMAIL, refer to the following release notes:

- ◆ [v8.3 Release Notes for TRITON AP-WEB](#)
- ◆ [v8.3 Release Notes for TRITON AP-DATA](#)
- ◆ [v8.3 Release Notes for TRITON AP-EMAIL](#)

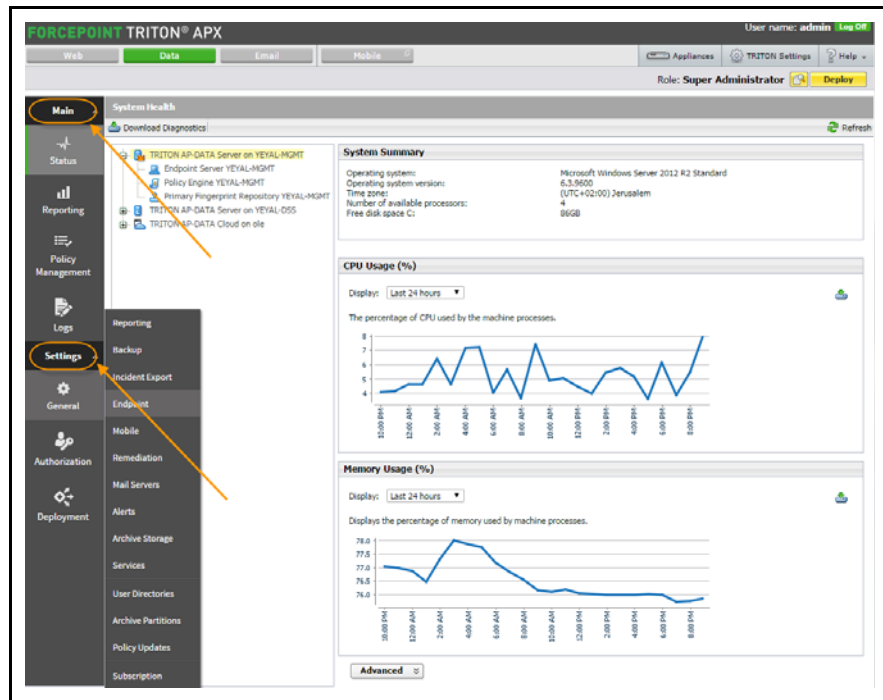

The release notes below are also available for v8.3:

- ◆ [v8.3 TRITON Appliances Release Notes](#)

Fresh look

The TRITON Manager has been redesigned to provide faster access to the menus and options you require. Instead of having 2 tabs in each module, Main and Settings, all options are now on one page.

The paths are the same. The functions are the same. But instead of clicking the **Settings** tab and then making another selection, for example, you select the option in the **Settings** section of the left navigation panel.

Supported browsers for TRITON Manager

Support has been added for the following browsers:

- ◆ Mozilla Firefox 49
- ◆ Google Chrome 54
- ◆ Microsoft Edge 38
- ◆ Internet Explorer 11

When you connect to TRITON Manager, you are presented with a self-signed certificate. The certificate names Websense, Inc., as the Organization (O). This will change to Forcepoint LLC in a future release. Because browsers do not recognize Websense, Inc., as a known Certificate Authority, a certificate error is displayed the first time you launch a TRITON management console from a new browser. To avoid seeing this error, install or permanently accept the certificate in the browser. After the security certificate is accepted, the manager logon page is displayed.

For the full list of supported browsers, see the [Certified Product Matrix](#).

Upgraded SQL Server support

TRITON products now support Microsoft SQL Server 2016 for the reporting and incident database. The version of SQL Express that's available for on-box installations has not changed.

The supported database engines are now:

- **SQL Server 2016** - Standard, Business Intelligence, and Enterprise editions
- **SQL Server 2014** - Standard, Business Intelligence, and Enterprise editions
- **SQL Server 2012 SP1** (or the latest service pack from Microsoft) - Standard, Business Intelligence, and Enterprise editions
- **SQL Server 2008** - All editions except Web, Express, and Compact; all service packs, 32- and 64-bit, but not IA64
- **SQL Server 2008 R2 SP2** (or the latest service pack from Microsoft) - All editions except Web and Compact; all service packs; not IA64
Standard, Business Intelligence, and Enterprise editions
- **SQL Server 2008 R2 Express** (installed by the TRITON Unified Installer)
- **SQL Server 2008 SP3** (or the latest service pack from Microsoft) - All editions except Web, Express, and Compact; all service packs, 32- and 64-bit, but not IA64

Upgrade paths

You can upgrade directly from v7.8.4 or later for all TRITON on-premises products. This includes v7.8.4, v8.0.x, v8.1.x, and v8.2.x. To see the upgrade path for earlier versions, refer to the following:

- ◆ [Upgrading to TRITON AP-WEB v8.3](#)
- ◆ [Upgrading to TRITON AP-DATA v8.3](#)
- ◆ [Upgrading to TRITON AP-EMAIL v8.3](#)

Deployment

Updated: 19-Dec-2016

Applies To:	Forcepoint TRITON APX Solutions v8.3
--------------------	--------------------------------------

Installation for Forcepoint TRITON products in your subscription is performed with a single installer for the TRITON infrastructure and reporting database. From this installer you can launch the installation of the individual TRITON products, as required.

To upgrade to TRITON APX version 8.3, all deployments of TRITON AP-WEB, TRITON AP-EMAIL, TRITON AP-DATA, Web Filter, Web Security, and Web Filter & Security must be at version 7.8.4 or later.

Important

You must have both .NET 3.5 and 4.5 installed before installing the TRITON infrastructure.

For more information, see the release notes for individual TRITON products, and the Installation Guides and Upgrade Guides in the Forcepoint Technical Library.

See the [Forcepoint TRITON APX Installation Guide](#) and the Release Notes for each TRITON product for more information.

Resolved and Known issues

Updated: 19-Dec-2016

Applies To:	Forcepoint TRITON APX Solutions v8.3
--------------------	--------------------------------------

For lists of resolved issues and limitations in this release, please see the Release Notes for each TRITON product.
