v3.3.1 Release Notes for Forcepoint Behavioral Analytics

Use the Release Notes to find information about what's new and improved in Forcepoint Behavioral Analytics version 3.3.1.

Features

Improved ElasticSearch

An update to the event retrieval logic in Forcepoint Behavioral Analytics has been made so events are retrieved initially by a request to a single ElasticSearch index. This prevents the ElasticSearch request queue capacity from being reached, which could occur when reviewing events.

Known Issues

A list of resolved and known issues in this release is available to Forcepoint Behavioral Analytics customers here.

If you are not currently logged in to the Forcepoint support website, clicking the link brings up a My Account login prompt. Log in to view the list.
