Release Notes: Topic 55301 / Updated: 6-January-2011

<b>Applies To:</b>	Websense Content Gateway v7.5.3
--------------------	---------------------------------

*How do I get the patch files?*

*Data Security integration*

*Websense Content Gateway v7.5.3 can now be integrated with Policy Engine v7.5.4 or later.*

## How do I get the patch files?

---

Go to MyWebsense.com and log in.

Then choose the **Downloads** tab, and Websense Web Security Gateway, as shown in this screen:

The screenshot shows the Websense Downloads page. At the top right, a red arrow points to the 'Downloads' tab. Below the 'Downloads' header, there is a section for 'Download Product Installers'. A note mentions 'WebSense v7.0 and 7.0.1' and provides instructions for users needing these versions. Below the note, there are filters for Product, Version, Operating System, Language, and Group By. A red arrow points to the 'WebSense Web Security Gateway' dropdown menu. Another red arrow points to the 'Version' dropdown menu. A third red arrow points to the '7.5.3' version link. Below the filters, there is a table with a row for 'WebSense Content Gateway' and a 'download >' link. On the right side, there are sections for 'quicklinks', 'WE ARE IMPROVING OUR SERVICE!', and 'We Welcome Feedback on This Site.'.

## Data Security integration

WebSense Content Gateway v7.5.3 is compatible with all v7.5 versions of the Data Security Management Server, including v7.5.3 and later, but Websense recommends that customers upgrade to Data Security v7.5.3 prior to upgrading to Content Gateway v7.5.3.

WebSense Content Gateway v7.5.3 can now be integrated with Policy Engine v7.5.4 or later.
